

# VSaaS by Bosch

## Agile video surveillance solutions, tailored for business

**BOSCH**  
Invented for life

VSaaS by Bosch enables users to monitor, manage, record, and replay video footage directly in the cloud. It helps site managers, security operators, or operations staff make quick decisions when faced with events, preventing them from becoming incidents. The solution is highly flexible and scales with any business.

### A true cloud solution

Cameras are the only on-site requirement

Remote management and maintenance

Easy and secure connection

Cloud or edge recording

### Future-proof investment

Up to 18,000 cameras per cloud instance

Unlimited number of web clients

Flexible storage size

Pay only what you use

### Predictive solution

VSaaS and Bosch IP cameras with built-in AI to support predictive solutions

### Convenience

Easy and secure access to video footage from anywhere at any time

### Cost-efficiency

Reduced upfront investment

### Openness

No vendor lock-in – Bosch cameras keep their benefits when used with other providers

Third-party camera compatibility

Open ecosystem, configuration and integration capabilities

### Data security

Certificate based end-to-end security

Regular and automated system updates
