

Easy, scalable, flexible:

Streamline your business with our new DICENTIS software licensing

The award-winning DICENTIS family of conferencing products – a revolutionary, future-proof platform for the integrated conference world of tomorrow, is one of the most comprehensive conference solutions in the market. DICENTIS conferencing systems from Bosch are the perfect choice for a wide range of meeting applications, from small-sized organizations to multinational corporations, ranging from local to national governments to international summits. Standardized IP technology and a software-based ecosystem ensure a reliable, scalable and future-proof conference solution.

With the DICENTIS Conference System, we have one goal in mind: enhancing meetings by continuously improving meeting efficiency and system flexibility.

Invented for life

BOSCH

Maximize the efficiency of your meeting with the DICENTIS Software suite

Along with our extensive range of DICENTIS conferencing hardware devices, its user-friendly software with dedicated meeting functions ensures optimum usability and configuration for conference systems. As every organization has different requirements, the DICENTIS product portfolio offers a multitude of hardware for every application – all backed up with powerful and easy-to-use software. Our DICENTIS Software suite includes a comprehensive set of features to maximize the efficiency of your meeting. The software functions include system configuration, meeting preparation with agenda points

and voting scripts, synoptic control, participant database, attendance and access control.

The DICENTIS Software suite also allows for smooth integration with third party solutions. A wide range of functions can be implemented via its application programming interface (API) and the conference protocol. For conducting professional meetings, chairpersons and participants have access to a comprehensive feature set. Our software is continually enhanced by incorporating new insights from the field to provide our users with the best applications based on extensive user experience.

New software feature packages and license plans

Going forward, we are offering a fresh and more scalable approach to software licensing, designed to optimize the flexibility and utility of each license for the maximum benefit of our customers and their projects.

The DICENTIS System already includes a set of software features and standard functionalities without a license.

In addition to this, you can now choose from **feature packages** that each provide supplementary sets of features and functions to suit your specific needs.

These feature packages are offered with different **license plans** – Perpetual and Professional – that are purchased per-participant.

Simplify the decision-making: **Premium** and **Ultimate** feature packages.

| Features | Without license | With licenses (optional) | |
|---|-----------------|--------------------------|---------------------------------|
| | Included | Premium | Ultimate |
| Discuss | Base | Extended | Extended |
| Voting | × | Ad-Hoc voting rounds | Prepared voting rounds |
| Interpretation | × | Language selection | Prepare and manage interpreting |
| Meeting & Agenda | × | ✓ | ✓ |
| Participant Database | × | ✓ | ✓ |
| Identification & attendance registration | × | ✓ | ✓ |
| Meeting reports | × | ✓ | ✓ |
| Media sharing | × | ✓ | ✓ |
| Hall display | ✓ | ✓ | ✓ |
| Synoptic Control | ✓ | ✓ | ✓ |
| Dual Use | ✓ | ✓ | ✓ |
| API/Conf.Protocol for available functions | ✓ | ✓ | ✓ |
| Automatic Camera Control | HD-SDI | + Advanced IP switching | + Advanced IP switching |

Find the perfect fit and choose between a **Perpetual** or **Professional** license plan.

| | License plans of choice | | |
|---|---|--|--------------------------|
| | Perpetual (Permanent ownership) one time payment | Professional (Subscription or prepaid) yearly automatic renewal | yearly manual renewal |
| Available feature packs (per participant)* | | | |
| Premium | DCNM-LPP-PE | DCNM-LPPP-S1Y | DCNM-LPPP-P1Y |
| Ultimate | DCNM-LPU-PE | DCNM-LPUP-S1Y | DCNM-LPUP-P1Y |
| Software Maintenance (per participant)* | | | |
| Software Maintenance Agreement | Yearly DCNM-LPSMA-PE (1 st year included) | ✓ | ✓ |
| Additional Cloud services** | | | |
| Hybrid meetings enablement | × | ✓ 1 Participant included | ✓ 1 Participant included |
| Add-On Single Hybrid participant | × | DCNM-LPH-S1Y | DCNM-LPH-P1Y |
| Add-On Hybrid Value Pack for 10 participants | × | DCNM-LPH10-S1Y | DCNM-LPH10-P1Y |
| Access to future cloud services | × | \$ | \$ |

*Globally available. **Select countries only, please contact your local Bosch sales representative for more information. †Add-on payment to yearly Professional license plan.

The **Perpetual license plan** allows for permanent ownership of the software and includes a one-year software maintenance agreement. There is also an option to purchase additional years of software maintenance agreement separately. It is the best option for standalone conference systems where permanent ownership of the software is required.

The **Professional license plan** is a yearly renewable plan that includes an ongoing software maintenance agreement to ensure optimized performance, security, and reliability.

Furthermore, customers can access cloud-based services such as hybrid meetings (only available in select countries). One remote participant is already included as a freemium offer to experience and explore the benefits of our DICENTIS Hybrid Meetings solution. Additional remote participants can be added to the yearly contract enabling customers to pay only for the services they require and providing greater flexibility and scalability.

For more information of all individual licenses, download here the full set of datasheets.

The **new licensing model** provides flexibility and scalability to your project. Feature packages **“Premium”** and **“Ultimate”** offer various features and functions to suit your specific need. Both can be selected whether you choose for permanent ownership with **“Perpetual”** or go for the subscription based approach with the **“Professional”** license plan.

Unlock more flexibility and scalability with the **professional license plan**.

This plan provides you with greatest flexibility and requires lower initial investment costs, making it a future-proof investment based on transparent and predictable yearly costs.

What’s in it for the end customer?

- Lower initial investment costs
- Transparent and predictable yearly costs
- Increased flexibility with changing needs
- Maximum availability, security and functionality by regular software updates
- Future-proof investment

What’s in it for the system integrator and the installer?

- Long-term customer engagement
- Transparent and predictable yearly cost for clients
- Regular software updates available to keep customer system up-to-date
