

Effectively organizing and managing meetings

An integrated solution by Bosch and
Concilium

Challenges

Professional meetings often require extensive preparation times. Depending on the nature of the event, several prerequisites need to be defined and integrated in the conferencing workflow before the actual meeting can start, which can be sometimes difficult and time-consuming. Along with common tasks like preparing the agenda, attendant list and voting scripts, finding the best room layout on-site, and displaying content on various screens on the premises, there are more and more complex challenges to solve, such as integrating remote participants in hybrid meetings, broadcasting or recording the meetings, assigning special roles, and more.

Market requirements

Today, conferences may require the use of desktop devices, video displays, laptops, PA systems and PTZ cameras – all integrated to create a seamless multimedia meeting experience for both on-site and remote participants.

Professional customers expect a solution to precisely fit their needs, offering state-of-the-art functionality and flexibility while being easy-to-operate, failure-safe, tamper-free and capable of documenting the meeting and the results.

In partnership with

CONCILIUM

Bosch solution: complete integration with all functionalities

The DICIENTIS conference system maximizes speech intelligibility to make your meetings more efficient and more productive. With an IP- and server-based architecture, it is built on open standards to ensure a high degree of flexibility, superior audio performance for up to 100 languages, and enable third-party integration. The system harnesses the most powerful security protection on the market to safeguard sensitive data throughout the conference chain.

Concilium solution: meeting preparation, direction and remote participation

Concilium offers an innovative digital meeting manager for councils and company meetings, providing document management, remote participation, conference, camera control, broadcasting, and e-voting. The three main offerings cover all important functionalities, from meeting preparation to meeting management and remote participation.

Meeting preparation

Concilium offers a powerful tool for organizing different events – such as councils, boards and other corporate governance meetings. This tool is accessible by the administrative staff who usually organize daily meetings. Every event is customizable by setting the login mode, the quorum, and management of the delegates and the content to be discussed.

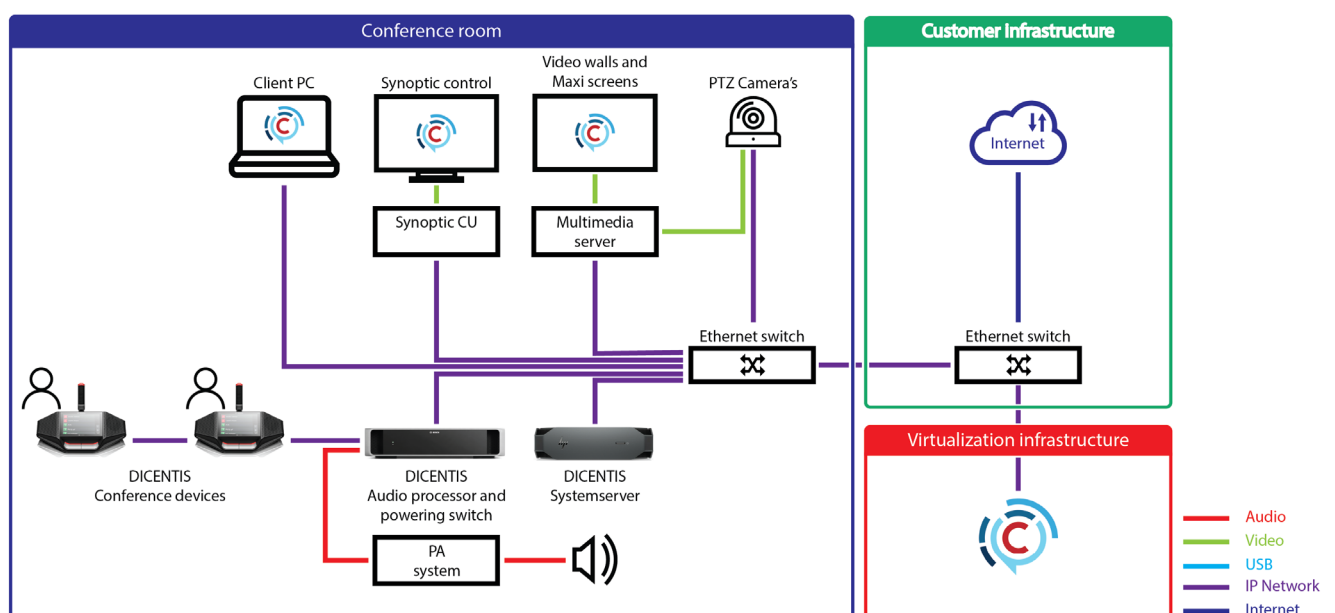

Meeting direction

These functions allow the user to be always in control of every meeting. All typical conferencing tasks are easy and intuitive to operate, such as setting up the agenda, speaker list, speech times, meeting room, the creation of voting scripts, as well as selecting video walls and controlling the broadcast.

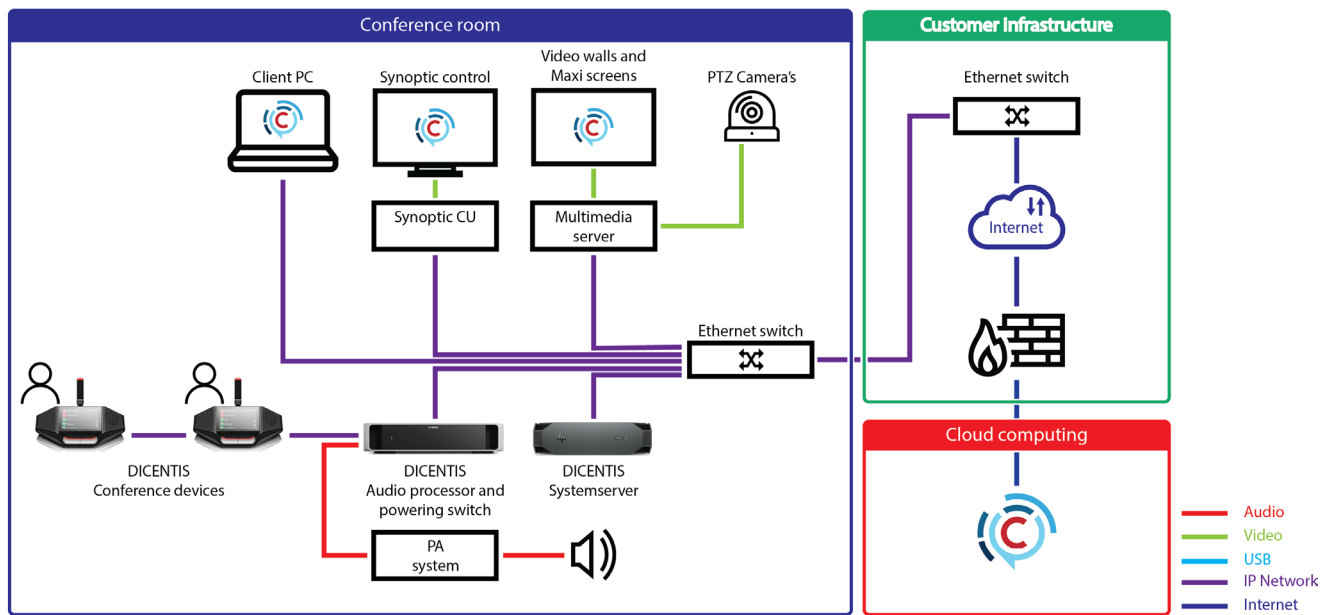

Concilium app

The Concilium app automatically connects customers to the cloud with their defined credentials via double authentication and biometrics for the highest security. The dashboard allows direct access to meetings, including documents shared in the cloud. The app is available for Android and iOS devices, runs on phones and tablets, and provides meeting interaction via remote participation.

Application example for on-site set up:

System example for cloud set up:

Benefits for the end-user (chairpersons, participants and operator)

- ▶ During the meeting, all required files can be retrieved for paperless meetings
- ▶ The meeting can be prepared in advance by setting up the agenda, creating the vote questions, preparing the delegate data, speaker list, and much more
- ▶ Automated meeting minutes can be created by automatic speech recognition
- ▶ Online live streaming of audio, video and data
- ▶ The Concilium app supports participants during meetings and allows them to participate remotely, manage documents, cast a vote, etc.

Benefits for the system integrator/installer:

- ▶ Complete, seamlessly integrated solution with our official integration partner Concilium
- ▶ Tested and approved solution offers peace of mind
- ▶ User-friendly, customizable solution with comprehensive features according to individual needs
- ▶ Easy to install and configure
