

# Access Management System Integrations and solutions

Access Management System (AMS) is the software for a robust access control solution. The system is also designed to offer full integration functionality. By collaborating with trusted business partners, we offer joint solutions to provide the best-in-class protection for our customers.

## Partner solutions

Biometrics

Offline electronic locks

Mobile credentials

Long range readers

These are third party products that work well with a Bosch access control system and add value through a specific application.

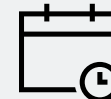

Connection is made possible through open standards, such as:

✓ **OSDP**    ✓ **Wiegand**    ✓ **OSS**

## Partner integrations

Video management

Time & attendance

Elevator management

Scanners

Partner integration is a connection between AMS and partner products based on a software solution developed by either party.

An integration gives added value with seamless data exchange and database alignment.

Connection is made possible through any of the following software solutions and others.

✓ **API**    ✓ **Adapter**    ✓ **Plug-in**

## Third party integrations with Access Management System

Last updated: September 30, 2024

Category	Partner	Type	Product	Interface	Link
