Invented for life

DICENTIS Flush range

Modular, IP-based conferencing
with cost-effective installation convenience

The DICENTIS family of conference devices extends its portfolio with the DICENTIS Flush range – a modular system of conferencing devices offering installation convenience in a distinctive, stylish design that fits any meeting type. Whether installed in governmental, non-governmental or intergovernmental organizations, or in commercial building and financial institutions, the

sleek form factor and the black finish of the modules will complement any interior. DICENTIS Flush range allows easy, cost-effective system scalability as future functionalities can be added as needed. Easy integration options and an enhanced user experience will make the DICENTIS Flush range your next go-to solution whenever table space and budget are key.

DICENTIS Flush range

Easy, cost-effective installation

- ▶ DICENTIS Flush empowers the specifier/installer to **tailor the system** to the required meeting type.
- ▶ The modular design **allows future additions** of functionalities as needed.
- ▶ OMNEO media networking architecture allows using **existing IP infrastructures** and PoE.
- ▶ All modules have a convenient **click-to-fit mechanism** for easy flush-mounting into metal or wood surfaces such as tabletops or seat armrests.
- ▶ The new flush range (with the exception of the loudspeaker panel) **shares the same installation footprint as Bosch DCN Flush devices**, allowing easy replacement without major rework.
- ▶ In combination with a base device in dual-seat setup, DICENTIS Flush **supports up to four delegate positions when two microphones are shared**, saving space and reducing cost.

Easy integration

DICENTIS Flush can be seamlessly combined with other DICENTIS tabletop devices, or with the DICENTIS interpreter desk as a fully ISO-compliant interpretation solution. Once connected, it immediately adopts the DICENTIS settings – no need to restart the system. The unique DICENTIS server-based system architecture makes integration with third-party applications and future cloud-based services easy, and offers a remote desktop application for maintenance purposes.

Enhanced user experience

Designed for an intuitive user experience and a more natural discussion atmosphere – the DICENTIS Flush range offers best-in-class audio quality and speech intelligibility. The loudspeaker module features the same high-quality speaker as the award-winning DICENTIS tabletop devices and also shares the feature that the loudspeaker and microphone can be active at the same time. To even enhance the audio quality further the shock-mount design of the microphone connection panel minimizes ambient noise and tabletop vibrations. For convenience short- and long-stem microphone options are available with screw lock connections.
