

Bosch Building Technologies Academy Training Catalogue 2020

Dear Customer,

Within this catalogue you have access to an overview of the trainings that we, Bosch Security Systems, offer to our customers in the **central locations of Grasbrunn, Germany and Eindhoven, the Netherlands.**

Although the majority of the featured trainings are classroom trainings, we have also included any Online Trainings that are necessary as a prerequisite in order to attend a specific classroom training.

This catalogue includes a broad choice of all the classroom trainings that we offer in our locations of Grasbrunn (Munich), Germany and Eindhoven, The Netherlands and therefore each business domain is represented, thus within this catalogue you will find trainings in: Video, Intrusion, Access Control, Management Systems, Public Address, Conference and Fire.

As we offer both online and classroom trainings you will see these symbols within this catalogue:

This symbol represents the trainings that are online

This symbol represents the trainings that take place in the classroom

This symbol represents Virtual Classroom Trainings

Virtual Classroom Trainings are conducted by a senior trainer via an online classroom within the program **Adobe Connect**.

Each page includes a description of the training together with the learning targets, prerequisites and target groups.

Please note that all our classroom trainings are English unless explicitly specified otherwise.

All **online trainings are free**, classroom trainings in this catalogue include pricing based on pricing per student for the full course. All prices are Prices before VAT.

Booking Information:

How to book a training:

In order to book a classroom training you need to go through the Bosch Building Technologies Academy and on the tab titled “registration” you are able to book yourself onto a training course. In order to access them you must first register an account, if you already have an account then you will be able to log straight on and access the trainings.

To partake in an online training you must register an account for the Bosch Building Technologies Academy, you will then be able to start the online training of your choice within the Bosch Building Technologies Academy, which you have access to at any time and can stop and start as you please.

How to register for the Bosch Building Technologies Academy:

The address of the Bosch Building Technologies Academy is

<https://academy.globalteach.com/ST/Login.aspx>

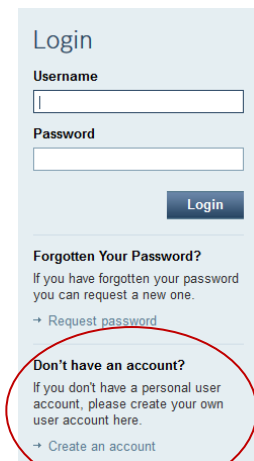

On this webpage you will find a link which says “create an account”

You will then be directed to the “Self Registration” page for new users

To complete the registration process please fill out all the necessary information

Please note that access to the Bosch Building Technologies Academy will be granted

within 48 business hours after the registration.

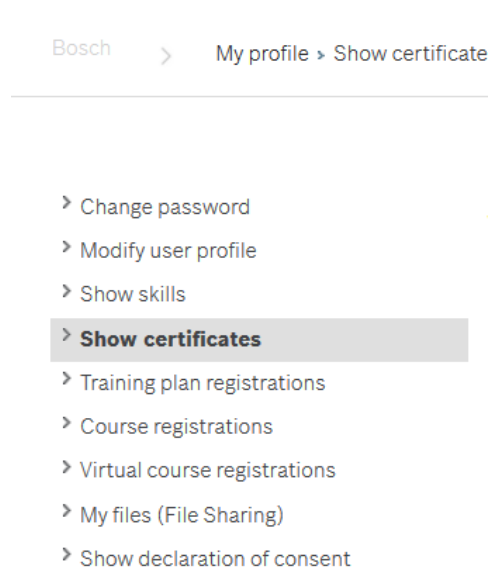

Further Questions:

Should you have any further questions regarding our trainings or problems with your account in the Bosch Building Technologies Academy please do not hesitate to contact us at:

CERTIFICATION:

Both online trainings and classroom trainings award the customer a certificate upon the successful completion of the course and online exam. These certificates are often prerequisites in order to progress further within a training plan to achieve the highest level.

All of the certificates achieved by the customer can be found in one place on the Academy website. The certificates are available as PDF which the customer has the option to download and print.

The certificates can be seen and downloaded by selecting the '**my profile**' tab at the top of the screen. The customer is then directed to their profile which features their username, language settings and company on the first page. The customer will see that on the left hand side of the screen there is a tab named '**Show Certificates**' – this is where all certificates that customers have achieved through both Online Trainings and Classroom lessons can be found, downloaded and printed.

You invest a lot of time and effort into qualifying yourself, and we believe that your customers and partners should know about it. The more you learn, the higher the qualification you earn; all our certifications follow the steps from the level *professional* to the level *expert*, and finally to the highest level, *master*.

Professional:
Online training on basic product features and system architecture

Expert:
Training on basic system design/configuration for lower complexity systems

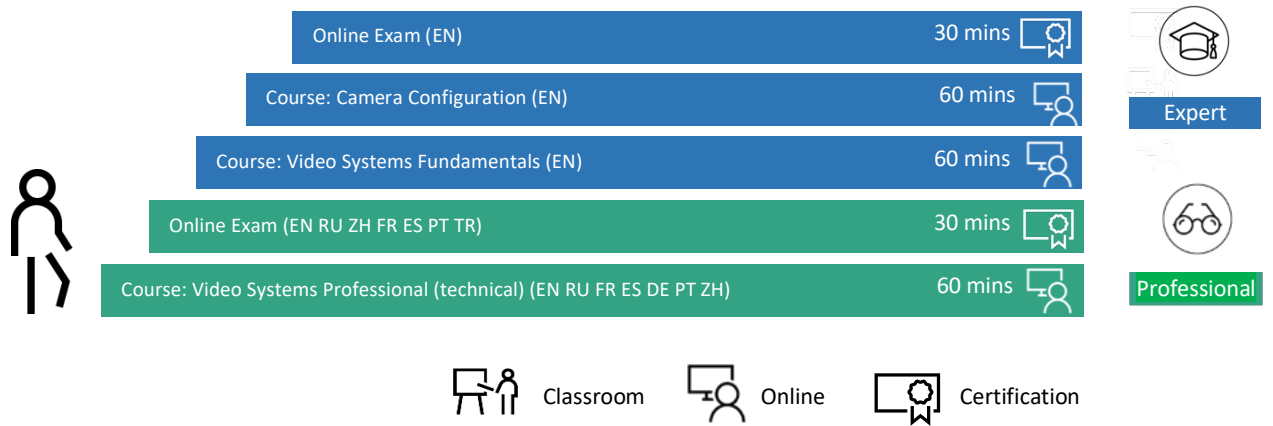

Master:
Training on advanced System configuration/integrated systems and in troubleshooting

“The more you learn, the higher the qualification you earn”

Bosch Video Systems Professional (Technical & Commercial)

Short description	<p>In this training, the customer will receive an overview of the Bosch world in general and will be provided with the basic information concerning the Bosch Video Systems technologies.</p> <p>The Technical module applies to all the Video Systems learning paths and the BVMS Technical learning path, whereas the Commercial module applies to The BVMS Commercial learning path.</p>
Content	<p>This training consists of 14 modules:</p> <ul style="list-style-type: none">• Startup instruction• Introduction• Quality and Trust• Easy installation• Leading solutions• Video Analytics• In-Store Analytics• Business Intelligence• Shaping the future• Fixed camera portfolio• Thermal camera portfolio• Moving camera portfolio• Recorder portfolio• End of training
Learning targets	<p>This training will explain the Bosch philosophy and the technologies behind our products.</p> <p>We will guide you through our different solutions and products that have been created for your needs.</p>
Prerequisites	<p>No prerequisites required</p>
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none">• System Engineers and Installers• Sales Support Engineer
Time estimation	<p>Technical: 60 mins Commercial: 120 mins</p>

Bosch Video Camera

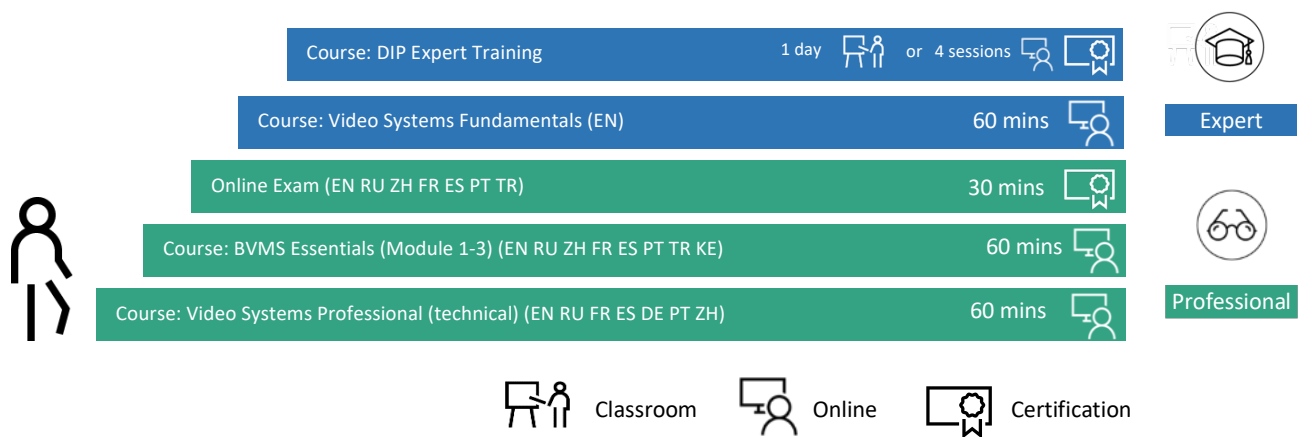

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

Short description	<p>In this training we will explain how to choose the correct camera for your application and what needs to be taken in consideration in the design of your system.</p> <p>We will then explain how to configure our camera via the different tools (Web GUI, configuration manager, project assistant)</p>
Content	<ul style="list-style-type: none">• Video systems fundamentals• Camera configuration
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none">• Install by mounting and assembling each different camera type• Understand how to configure the different camera settings• Troubleshoot camera problems• Get access to the camera from different client type
Prerequisites	<ul style="list-style-type: none">• Students need to complete the Bosch Video Systems Professional (technical) training (Refer to pg. 10)
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none">• System Enginners and Installers• Sales Support Engineer

Bosch DIVAR IP All-in-one

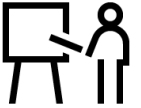

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

The languages supported for classroom trainings are subject to availability at the respective region.

Security

Bosch DIVAR IP All-in-one – Expert Level Training

Short description

In this training we will explain how to choose the correct DIVAR IP for your application and what needs to be taken in consideration in the design of your system.

We will then explain how to configure our DIVAR IP AIO for small size installations.

Content

- Video systems fundamentals
- DIVAR IP AIO hands-on training

Learning targets

By successfully completing this training the customer should be able to:

- Install & configure a Bosch Video solution

Prerequisites

Students need to complete the Bosch Video Systems Professional (technical) training. For deeper knowledge on our Bosch Video Management System (medium to big / complex installations) we advise to follow the Bosch Video Management System Expert Level training plan.
(Refer to pg. 10)

Target groups

Recommended for:

- System Engineers and Installers
- Sales Support Engineer

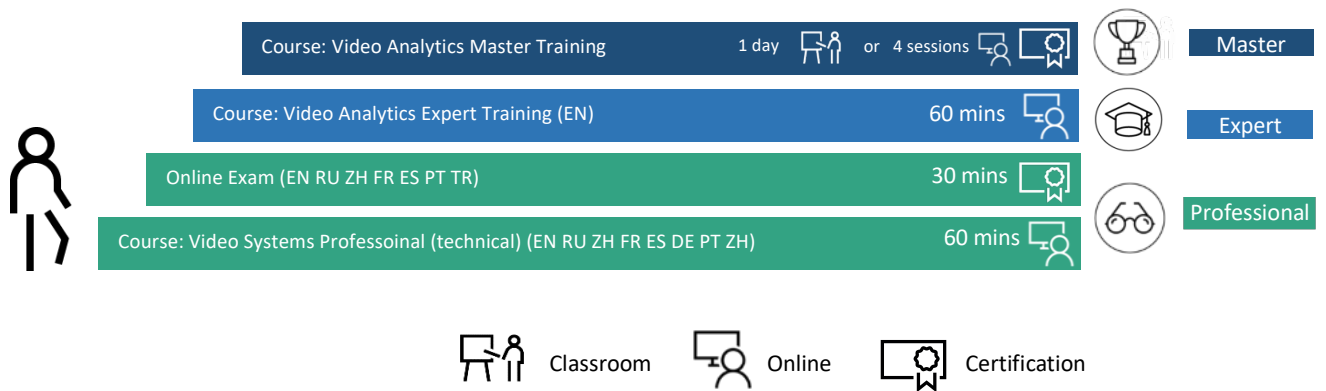

Commercial Information:

CTN number:

- Eindhoven: TRA-VIDESS-CM

Price: €300 per training per person (Price before VAT)

Bosch Video Analytics

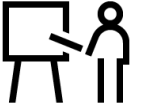

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

The languages supported for classroom trainings are subject to availability at the respective region.

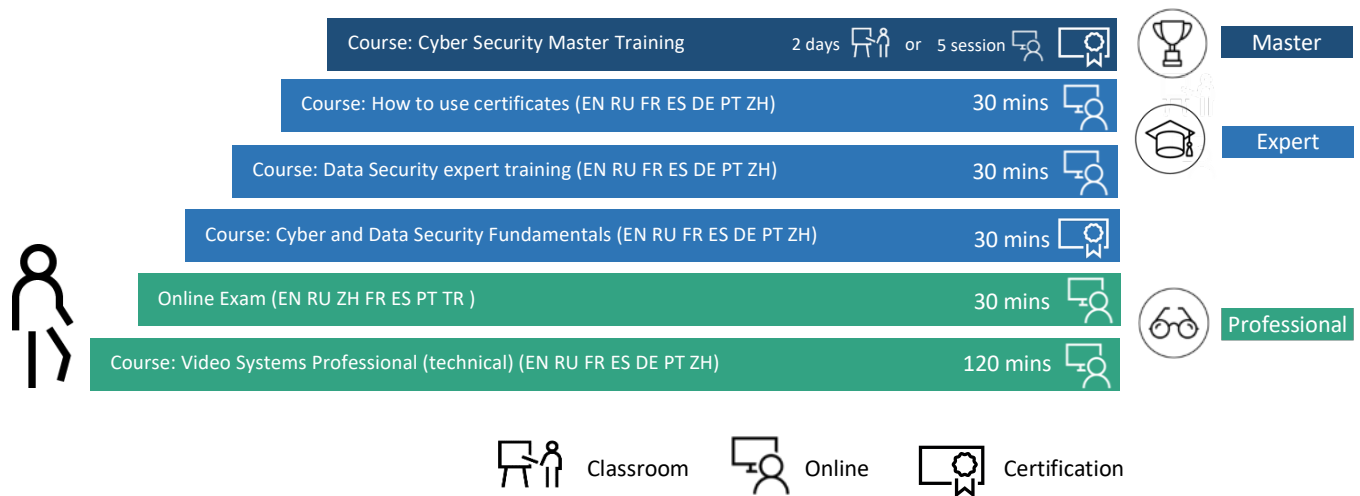

Security

Bosch Video Analytics

Short description	<p>In this training we will go deeper into the difference between our Essentials and Intelligent Video Analytics.</p> <p>We will then concentrate on the design and planning of a Video Analytics system.</p> <p>Once finished with the design part we will see how to configure the camera Video Analytics.</p> <p>And to finish we will concentrate on the Camera Trainer option of our Video Analytics. In which application can it be used and how to configure it.</p>
Content	<ul style="list-style-type: none">• Video analytics expert module• Video analytics Face to Face training <p>Before participation to the face to face training, students are required to complete the different online modules of the training plan.</p>
Learning targets	<p>Upon successful completion of this training the student will be able to:</p> <ul style="list-style-type: none">• Understand the differences between EVA and IVA• Configure the proper task for each alarm type• Calibrate the camera for the best alarm results• Select the tracking mode that fits the application• Configure special analytic types as flow control and face detection• Set up recording of meta data and perform forensic search
Prerequisites	<p>Students need to complete the Bosch Video Systems Professional (technical) training (Refer to pg. 10)</p>
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none">• System Engineers and Installers• Sales Support Engineer
Commercial Information:	<p>CTN number:</p> <ul style="list-style-type: none">• Eindhoven: TRA-VIDESS-CM <p>Price: €300 per training per person (Price before VAT)</p>

Cyber Security for Video Systems

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

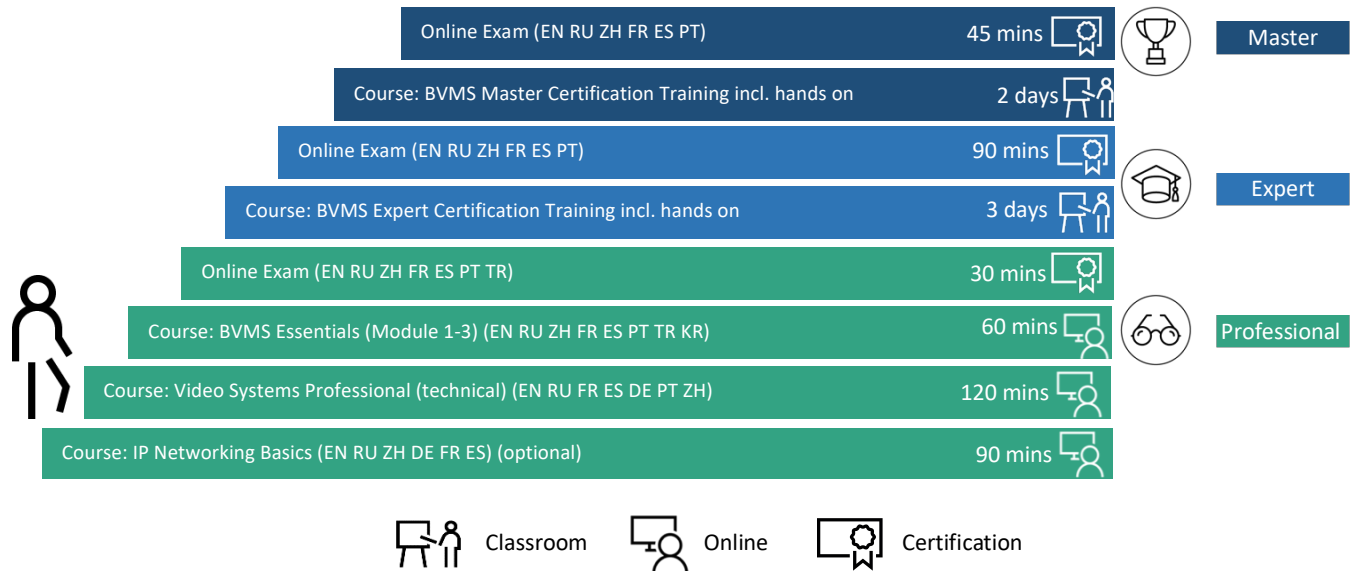

The languages supported for classroom trainings are subject to availability at the respective region.

Cyber Security for Video Systems

Short description	<p>This course introduces students to several aspects cyber security and how they pertain to IP Video systems today. Students will learn to analyze possible threats as well as how to lock down and reduce the attack surface of their IP video system. Emphasis is given to the legal aspects of vulnerability analysis as well as handling of evidentiary material.</p> <p>This course requires a minimum of 2 students for the course to take place.</p>
Content	<ul style="list-style-type: none">• Basic cyber security fundamentals• Data security expert training• How to use certificates• Cyber Data Security Face to Face training <p>Before participation to the face to face training, students are required to complete the different online modules of the training plan.</p>
Learning targets	<p>To be able to predict, analyze and troubleshoot possible threats with Bosch product.</p>
Prerequisites	<ul style="list-style-type: none">• Medium-high level knowledge of IP and Networking and you need to have completed the Bosch Video Systems Professional (technical) training (Refer to pg. 10)• Recommended: BVMS Professional online and Expert classroom certifications.
Target groups	<p>Technicians, Project Managers and IT Professionals</p>
Duration	<p>2 days (for Master Level Classroom Training)</p>
Commercial Information:	<p>Location wise CTN numbers:</p> <ul style="list-style-type: none">• Eindhoven: TRA-CYDASE-VM <p>Price: €600 per training per person (Price before VAT)</p>

BVMS OVERVIEW – Technical Certification

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

G-Series and B-Series – Expert Training Plan

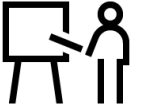

Short description	This Training Plan is made up of 1 Online Training and a 2 day Classroom Training Course
Content	<p>The Online Training featured in this Training Plan is made up of 5 modules:</p> <ul style="list-style-type: none">• Introduction to IP Networking for Intrusion• G-Series Installation with Wired Devices• B-Series Installation with Wireless Devices• Introduction to Installer App Programming• Intrusion and IP Camera Integration
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none">• Explain the benefits and operation of G-Series Control Panels for commercial use• Mount and install peripheral devices to work with the Control Panel• Perform basic programming options in Bosch's Remote Programming Software (RPS), as well as via the Keypad.
Prerequisites	<ul style="list-style-type: none">• Successful completion of the G-Series and B-Series Professional Training Plan
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none">• Installers• Engineers• System Designers• Sales Support Engineers
Training Duration	2 days
Commercial Information:	<p>CTN number:</p> <ul style="list-style-type: none">• Grasbrunn: TRA-GBSE-IE <p>Price: €600 per training per person (Price before VAT)</p>

Bosch Building Integration Systems (BIS) Overview

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

The languages supported for classroom trainings are subject to availability at the respective region.

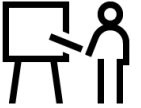

Short description	<p>A Training Plan which consists of a 4.5 day Classroom Training. During this training the customer will learn how to properly install and configure BIS for basic functions.</p> <p>Furthermore, through practical examples, modifications on the Graphical User Interface (GUI) a solid knowledge should be gathered to operate and customize the system.</p> <p>Each chapter of the training contains hands-on practice either on the BIS SW or on related software, like hardware and OPC configuration Software.</p>
Content	<p>The modules and topics that will be covered within this training plan are:</p> <ul style="list-style-type: none"> • Bosch BIS Server installer and configuration • BIS Client installation and GUI customization • Access Engine configuration and operation • Creating door models, change parameters of doors and readers • Creating cardholders, authorizations, profiles, Time Models • Integration with Bosch Fire and Intrusion panels • Create associations to show alarm messages • Send commands from BIS to subsystems based on event(s) • BVMS integration and Video Engine basics • Displaying alarm related cameras and remove them when the alarm is cleared • Basic BIS Troubleshooting • Logging and reading/understanding the log files and the use of configuration collector • Use of AutoCAD in order to prepare ACAD drawings for BIS • Fundamental practical Hands-On exercises • Licensing of the individual connections • Operation and maintenance: automated event log backup, configuration backup and migration
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none"> • Explain the functionality of BIS and properly allocate BIS to projects • Install, configure and operate BIS • Provide pre-sales demonstrations for end-users and for investors • Provide customized end-user operator training • Customize the AutoCAD drawing and BIS GUI • Create price quotations and license BIS properly • Execute basic operation and maintenance tasks • Import cardholders' data from an existing access control system • Backup/Restore event log DB • Backup/Restore and migrate configuration
Prerequisites	<ul style="list-style-type: none"> • IP networking fundamentals including IP addressing schemes, subnet mask settings and basic troubleshooting • Knowledge of Microsoft Windows like changing values in the Registry, usage of the command prompt

	<ul style="list-style-type: none"> • The knowledge of Access Control product portfolio according to the “Professional Level” training • Expert Level Certificate for the following Bosch products (configuration and operation): <ul style="list-style-type: none"> ○ Fire FPA5000 and/or FPA1200 ○ Intrusion Panel MAP5000 ○ Intrusion Panel B/G-Series <p>Bosch VMS and Bosch Video over IP devices</p> <ul style="list-style-type: none"> • Participants will only be accepted onto the course if they have completed the IP Networking Basics Online Training.
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none"> • System Integrators, Project Engineers, Administrators and Installers who are responsible for installing, commissioning and for maintenance of the BIS system • Project Engineers, Sales Support Engineers, System Architects who want to gain practical experience with BIS and have responsibility in system design and quotations • NOTE: This training cannot be considered as a suitable training for Operators who should work on a daily basis with the BIS operator client.
Training Duration	4.5 Days
Commercial Information:	<p>CTN number:</p> <ul style="list-style-type: none"> • Grasbrunn: TRA-BIS-EE <p>Price: €1800 per training per person (Price before VAT)</p>

Bosch Building Integration System (BIS PLATFORM TRAINING)

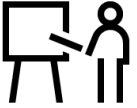

- Master Level Training

Short description	<p>A Training Plan which comprises of 1 Classroom Training</p> <p>This training will teach you advanced configuration possibilities of BIS Platform. Furthermore, it will cover features and functionalities which are required in multi-site BIS projects, and also in projects, where the customization of the Graphical User Interface is necessary.</p> <p>Additionally, this training teaches you to connect PRAESIDEO and Conetix subsystems to BIS, and also the use of Template Jobs.</p>
Content	<p>The modules and topics that will be covered within this training plan are:</p> <ul style="list-style-type: none">• AUE-PRAESIDEO connection (How to set up PRAESIDEO; installation and configuration of PRAESIDEO OPC; configuring PA Manager; customizing PA-related detector type commands; interconnection with other subsystems; licensing)• AUE-Conetix connection (How to set up D6600 for BIS Connection; installation and configuration of D6600 OPC; Customizing Conetix-related points; limitations; licensing)• Multi-site BIS configuration (set up consumer server; set up provider server; connect servers to each other)• OPC Connector (when it should be used; configuring it)• BIS Proxy OPC-DA (when it should be used; configuring it)• Analog Values in BIS• Customizing detector symbols• Use of template jobs• Graphical User Interface customization (use of object models; auto delete; multiple message inbox; use of multiple monitors; message inbox customization; subscription control)
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none">• Connect a PRAESIDEO system to BIS, and set up its special HTML page for easier control of the integrated system• Connect a Bosch Conetix receiver to BIS• Configure consumer and provider servers for Multi-Site BIS systems and establish the communication between these serves• Create new – project specific – detector symbols• Configure the OPC connector and the BIS Proxy OPC-DA OPC Server• Carry out advanced customization tasks on the BIS Graphical User Interface
Prerequisites	<ul style="list-style-type: none">• Participation in the Bosch BIS Expert Level Training (4,5 Days)• Practical (project-site) experience with BIS• Configuration knowledge of both the PRAESIDEO and Conetix systems
Target groups	<p>Recommended for:</p> <ul style="list-style-type: none">• System Integrators• Project Engineers

	<ul style="list-style-type: none"> • Administrators • Installers who are responsible for installing, commissioning and maintenance of the BIS system
Training Duration	2 Days
Commercial Information:	CTN number: <ul style="list-style-type: none"> • Grasbrunn: TRA-BIS-EM Price: €800 per training per person (Price before VAT)

Building Integration System (BIS) Master Level – BIS ACE

Short description	A Training Plan which consists of 1 Classroom Training This training will teach the customer advanced configuration possibilities of BIS Access Engine. Furthermore, it will cover features and functionalities which are required in multi-MAC and remote SQL database BIS projects.
Content	The modules and topics that will be covered within this training plan are: <ul style="list-style-type: none">• Multi-MAC configuration• Remote SQL ACE database configuration• Practice on Elevator and DM10 Door Models• Configuring the Report Builder• Setting up Divisions• Configuring and use of fingerprint readers• Configuring and use of Deister key cabinet
Learning targets	By successfully completing this training the customer should be able to: <ul style="list-style-type: none">• Set up a BIS access control system with multiple MACs• Configure a system, in which the Access database is located on a remote SQL machine• Design and configure Door Model 10• Configure and use fingerprint readers• Configure and use Deister key cabinet
Prerequisites	<ul style="list-style-type: none">• Participation in the Bosch BIS Expert Level Training• Practical (project-site) experience with BIS
Target groups	Recommended for: <ul style="list-style-type: none">• System Integrators and Project Engineers• Administrators• Installers who are responsible for installing, commissioning and for maintenance of the BIS system, especially when access control is included
Training Duration	3 days
Commercial Information:	CTN number: <ul style="list-style-type: none">• Grasbrunn: TRA-BIS-EM Price: €1200 per training per person (Price before VAT)

Security

Access Professional Edition (APE)

Short description	A Training Plan which comprises of 1 Classroom Training During this training the customer is introduced to the Bosch APE Software and to the AMC controller Product Family
Content	The modules and topics that will be covered within this training plan are: <ul style="list-style-type: none">• Basic Introduction to the Access Professional Edition Software• Introduction to AMC Controller Programming• Practical Programming of AMC2 hardware & APE software• APE integration to Milestone XProtect
Learning targets	By successfully completing this training the customer should be able to: <ul style="list-style-type: none">• Work with and set up an Access Control System based on Bosch AMC hardware and Access Professional Edition Software
Prerequisites	<ul style="list-style-type: none">• Basic network knowledge• To participate in this training the customer should have some previous experience in Access Control Systems, Installation and Configuration• Milestone XProtect knowledge is beneficial but not required
Target groups	Recommended for: <ul style="list-style-type: none">• Installers• Project Engineers• Service Engineers
Training Duration	2 Days
Commercial Information:	CTN number: <ul style="list-style-type: none">• Grasbrunn: TRA-APE-EP Price: €600 per training per person (Price before VAT)

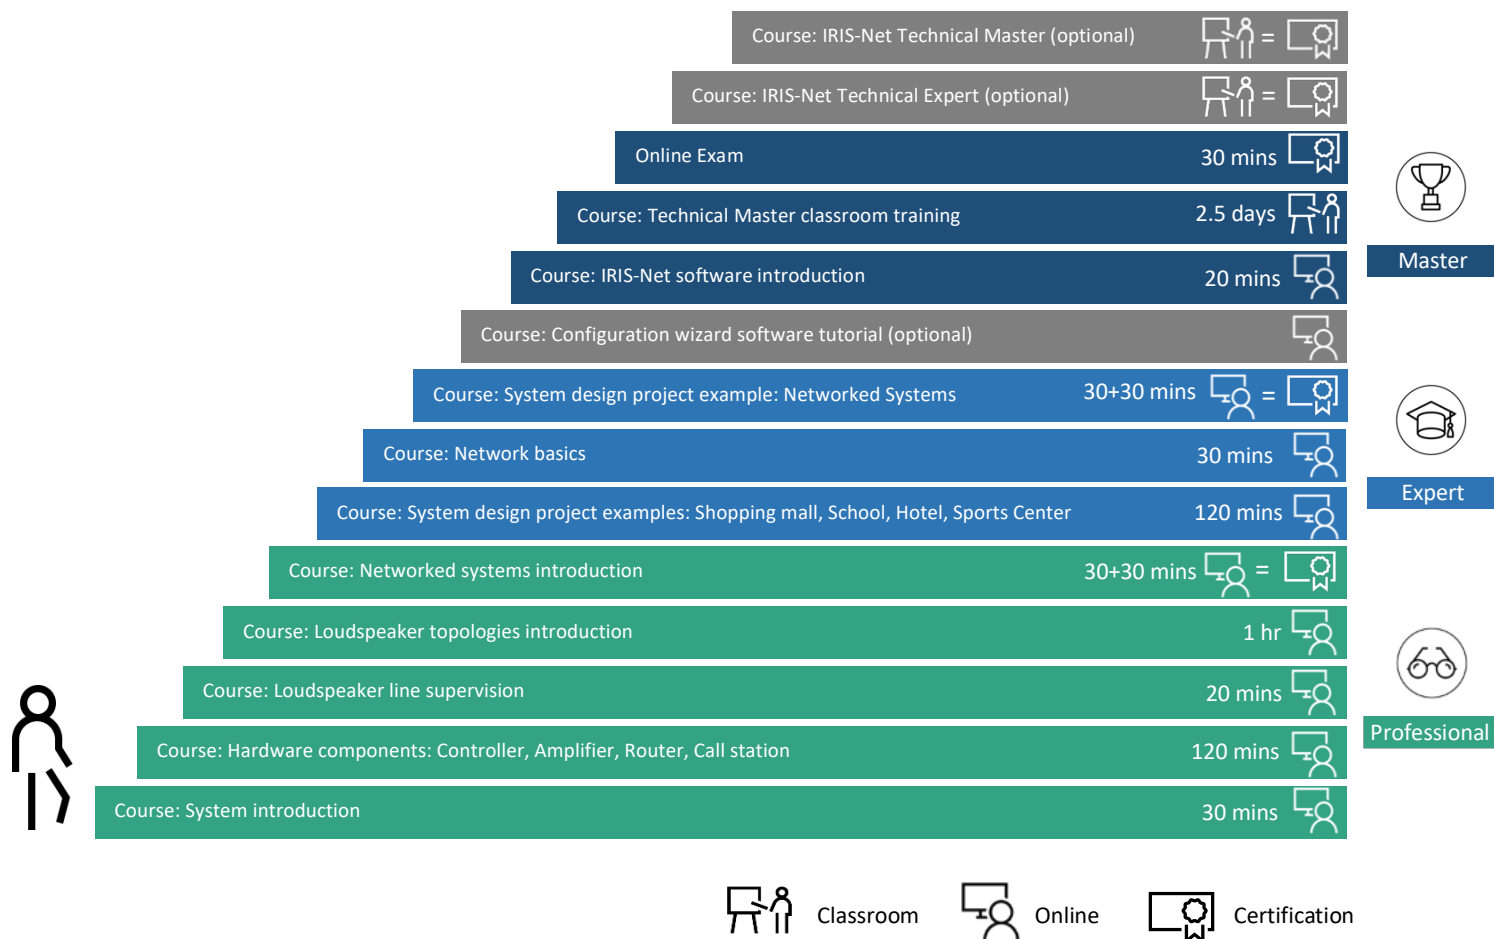

Communication

Bosch Public Address PA basics – Professional Training (Online)

Short description	Online Training In this training we will provide you with the basic information concerning audio and public address technologies.
Content	The modules that will be part of this online training is: <ul style="list-style-type: none">• Public Address basics• 100Volt Basics• Microphones• Loudspeakers• Amplifiers• Mixing Amplifiers• Application of characteristics of Public Address Systems
Learning targets	By successfully completing this training the students will be able to: <ul style="list-style-type: none">• Show basic understanding of the principles of operation of public address• Recognize the different components and techniques used in a public address• Understand basic applications and markets of public address• Follow more advance and specific Public Address trainings in this catalog
Prerequisites	<ul style="list-style-type: none">• Basic knowledge of electricity / electronics
Target groups	<ul style="list-style-type: none">• Employees, commercial and technical, with no or limited experience in PA• Beginners who hardly have experience in the Public Address business and want to attend other Public Address trainings

PAVIRO Overview

The learning path is also available in the Bosch Building Technologies Academy. You only need to click on the certification symbol and you will be routed directly to the correct learning path.

Bosch Public Address PRAESENSA– Expert (Online)

Short description	This online training brings concepts about system design and configuration for Bosch PRAESENSA Public Address & Voice Alarm System, aiming to give a more complete overview about these components, with their key features and systems applications, using project examples to show how to build up a Bill of Materials according to the project requirements. An Expert Level Certificate will be available upon successful completion of this online training and exam.
Content	<p>The modules and topics that will be covered within this Expert Level Certification are:</p> <ul style="list-style-type: none">• OMNEO Networking – Expert Level (IP-Advanced & OMNEO tools)• System design approach• System planning tool• Amplifier selection• Power design• Network design• 3rd party network devices• System design examples
Learning targets	<p>By successfully completing this online training the student will:</p> <ul style="list-style-type: none">• Recognize and be able to use broader and more in depth knowledge on IP Networks and Audio Networks• Learn how to use and setup OMNEO tools• Understand the particularities of designing a Public Address System and Voice Evacuation System• Be able to specify a PRAESENSA system according to the project requirements and turn this specification into a Bill of Material
Prerequisites	<ul style="list-style-type: none">• Bosch PRAESENSA Public Address & Voice Alarm System – Professional Level (online training)
Target groups	<ul style="list-style-type: none">• Systems Integrators, Distributors, Installers, Specifiers, Consultants, Sales and Marketing

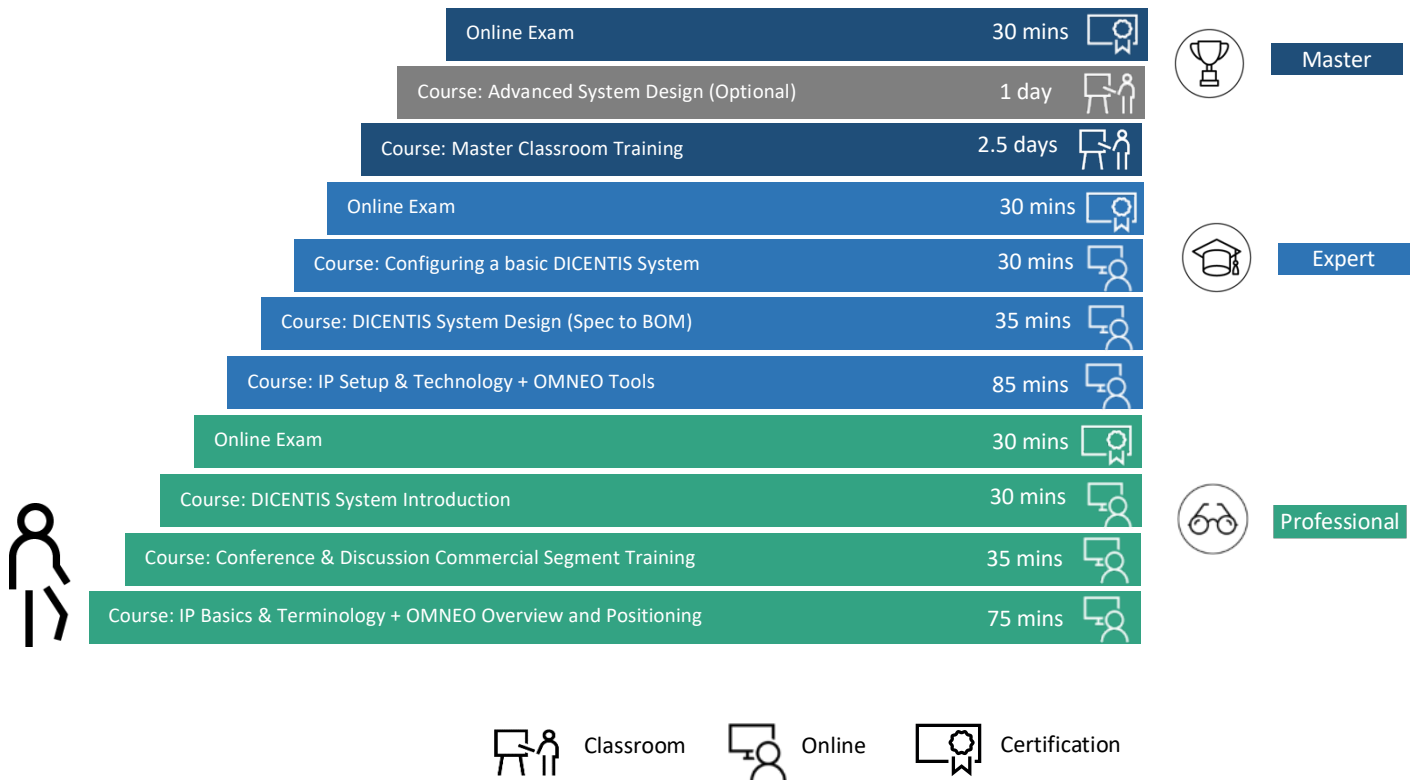

Public Address

Bosch Public Address PRAESENSA– Master

Short description	This classroom training brings an immersive and unique opportunity to master Bosch PRAESENSA Public Address & Voice Alarm System, including hands on experience on all hardware & software offerings for complete programing and operation of the system. A Master Level Certificate will be available upon successful completion of this classroom training and online exam.
Content	<p>The modules and topics that will be covered within this training certification level are:</p> <ul style="list-style-type: none">• System components• Installation and uploading of the Firmware• Configuration and hands-on• PRAESENSA network basics
Learning targets	<p>By successfully completing this online training the student will be able to:</p> <ul style="list-style-type: none">• Configure and commission a Bosch PRAESENSA Public Address & Voice Alarm System• Recognize how to update system firmware for the respective hardware components• Setup all Hardware and Software components simulating real live system for different projects
Prerequisites	<ul style="list-style-type: none">• PRAESENSA Public Address & Voice Alarm System – Professional Level (online training)• PRAESENSA Public Address & Voice Alarm System – Expert Level (online training)
Target groups	<ul style="list-style-type: none">• Systems Integrators, Distributors, Installers and Consultants
Training Duration	3 days
Commercial Information:	<p>CTN number:</p> <ul style="list-style-type: none">• Eindhoven: TRA-PRA-COM <p>Price: €900 per training per person (Price before VAT)</p>

Conference and Discussion

Bosch Conference DICENTIS – Technical Professional

Short description	This online training consists of multiple modules and aims to provide you an overview about Bosch DICENTIS Conference & Discussion System hardware and software components. A Professional Level Certificate will be available upon successful completion of this online training and exam.
Content	<p>The modules and topics that will be covered within this training certification level are:</p> <ul style="list-style-type: none">• OMNEO Networking – Professional Level (IP-Basics & OMNEO overview)• The DICENTIS System – applications• Central equipment• Discussion devices• Microphones• Interpreter desks• Software• Accessories and Installation Equipment• Basic system overview
Learning targets	<p>By successfully completing this training the student will be able to</p> <ul style="list-style-type: none">• Recognize system hardware and software components• understand system & components features• Identify system connectivity• Describe a basic system overview• show knowledge on IP Networks and Audio Networks
Prerequisites	<ul style="list-style-type: none">• There are no prerequisites for this certification level
Target groups	<ul style="list-style-type: none">• System Integrators, Distributors, Installers, Specifiers, Consultants, Sales and Marketing and End Users

Conference and Discussion

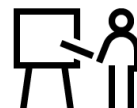

Bosch Conference DICENTIS – Technical Expert

Short description	This online training brings concepts about system design and configuration for Bosch DICENTIS conference system, aiming to give a more complete overview about these components, with their key features and systems applications, using examples to show how to build up a Bill of Materials according to the project requirements. An Expert Level Certificate will be available upon successful completion of this online training and exam.
Content	<p>The modules and topics that will be covered within this training certification level are:</p> <ul style="list-style-type: none">• OMNEO Networking – Expert Level (IP-Advanced & OMNEO tools)• System design approach• System calculation tool• Device selection• Network design• System design examples
Learning targets	<p>By successfully completing this training the student will be able to</p> <ul style="list-style-type: none">• recognize and be able to use broader and more in depth knowledge on IP Networks and Audio Networks• show how to use and setup OMNEO tools• understand the particularities of designing a DICENTIS Conference System• specify a DICENTIS system according to the project requirements and turn this specification into a Bill of Material
Prerequisites	<ul style="list-style-type: none">• Bosch DICENTIS Conference System – Professional Level (online training)
Target groups	<ul style="list-style-type: none">• System Integrators, Distributors, Installers, Specifiers, Consultants, Sales and Marketing

Conference and Discussion

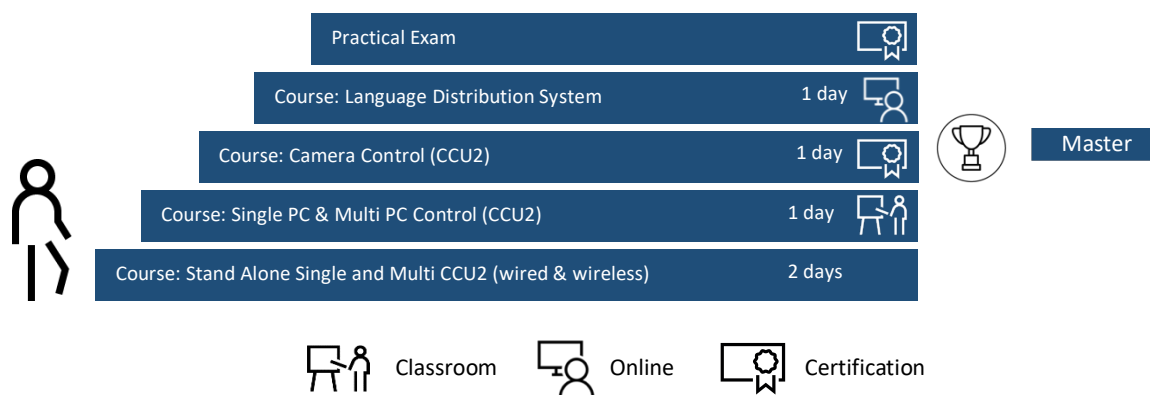

DICENTIS – Technical Master

Short description	<p>This classroom training brings an immersive and unique opportunity to master Bosch DICENTIS Conference & Discussion System, including system design, hands on experience on all hardware & software offerings for complete programming and operation of the system. A Master Level Certificate will be available upon successful completion of this classroom training and online exam.</p> <p>Note: parts of this training will be transferred to a web based training in the course of the year.</p>
Content	<p>The modules and topics that will be covered within this training certification level are:</p> <ul style="list-style-type: none">• System design approach• System calculation tool• System Licensing• Discussion device selection• Network design• System design exercises• System components• Installation and uploading of the Firmware• Configuration and hands-on• Explanation and hands-on on all available functions
Learning targets	<p>By successfully completing this training the student will be able to</p> <ul style="list-style-type: none">• configure a Bosch DICENTIS Conference System• recognize how to update system firmware for the respective hardware components• setup all Hardware and Software components simulating real live system for different projects and scenarios•
Prerequisites	<ul style="list-style-type: none">• Bosch DICENTIS Conference System – Expert Level (online training)
Target groups	<ul style="list-style-type: none">• Systems Integrators, Distributors, Installers and Consultants
Training Duration	2.5 + 1(optional) days
Commercial Information:	<p>CTN numbers:</p> <ul style="list-style-type: none">• Eindhoven: TRA-DCN-COM <p>Price: €750 + €300 (optional) per training per person (Price before VAT)</p>

Fire

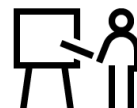

FPA-5000 Technical Professional Training Plan

Short description	<p>This training plan includes several topics and modules that will give you an overview of</p> <ul style="list-style-type: none">• the basic components of the Bosch Fire Alarm Panel FPA-5000• different technologies and applications for Bosch Fire Detectors• different types of manual call points <p>You will also learn how to use the Bosch Planning Tool in your daily work.</p> <p>Please register to the Training Plan and open it afterwards in order to see the assigned individual Online Training offering.</p>
Content	<p>This training plan will include:</p> <ul style="list-style-type: none">• Bosch Fire Alarm System FPA-5000• Bosch Fire Peripherals• Bosch Fire Planning Tool: Safety Systems Designer
Learning targets	<p>By successfully completing this training plan the customer should be able to:</p> <ul style="list-style-type: none">• Understand the modular concept of the FPA-5000• Get familiar with functional concept of LSN and basic structure of RPS• Understand features and differences of Bosch products and learn about their technical data• Create:<ul style="list-style-type: none">○ projects of different sizes○ bill of material○ tender texts○ battery and loop calculations and○ schematic drawingswith the Safety Systems Designer
Prerequisites	<ul style="list-style-type: none">• Basic Fire Knowledge
Target groups	<ul style="list-style-type: none">• System Integrators

Fire

Fire Alarm Panel FPA-5000 Technical Training - Expert

Short description	A 2 day Classroom training and online exam which concerns the modular fire panel FPA-5000 and basic diagnostics procedures. In order to achieve the Technical Expert qualification the customer must attend all training days of the classroom trainings and pass an Online Exam after the Trainings.
Content	<p>This training plan will include:</p> <ul style="list-style-type: none">• A Recap of Modular Concept• Redundancy• Recap LSNi Basics• LSN Advanced• LSNi Test Tool• “Do’s and Don’ts” Installation• Maintenance• Programming with RPS• Troubleshooting• Simple Networking• Hands-on sessions
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none">• Have a general understanding of the FPA product family• Design, install and program an FPA-5000 system in stand-alone set-up
Prerequisites	<ul style="list-style-type: none">• Basic Fire Knowledge• Completed FPA-5000 Technical Professional Training Plan
Target groups	<ul style="list-style-type: none">• Installers• System Integrators
Training Duration	2 days
Commercial Information:	<p>Location wise CTN numbers:</p> <ul style="list-style-type: none">• Grasbrunn: TRA-FPA-FE• Eindhoven: TRA-FPA-CE <p>Price: €600 per training per person (Price before VAT)</p>

Fire

Fire Alarm Panel FPA-5000 Technical Training - Master

Short description	<p>A 2 day Classroom training and online exam which concerns the networking capabilities of the Bosch FPA-5000 Fire Alarm Panel.</p> <p>In order to achieve the Technical Master qualification the customer must attend all training days of the classroom trainings and pass an Online Exam after the Trainings.</p> <p>The completion of the Online Training IP Networking Basics should also be completed at this time. (See page 12)</p>
Content	<p>This training plan will include:</p> <ul style="list-style-type: none">• Complex networks (CAN, IP, OPC)• Connection to FSM• Smart Safety Link (Integration to Praesideo, Paviro)• RPS Programming advanced: application of rules over FPA network• Hands-on sessions
Learning targets	<p>By successfully completing this training the customer should be able to:</p> <ul style="list-style-type: none">• Have a general knowledge about FPA-5000 networking and connection to FPA-OPC, Fire Evac and FSM-2500/5000• Install, configure and commission an FPA-5000 network
Prerequisites	<ul style="list-style-type: none">• Certificate Expert Level
Target groups	<ul style="list-style-type: none">• Experienced Electrical Design Engineers
Training Duration	2 days
Commercial Information:	<p>Location wise CTN numbers:</p> <ul style="list-style-type: none">• Grasbrunn: TRA-FPA-FM• Eindhoven: TRA-FPA-CM <p>Price: €600 per training per person (Price before VAT)</p>

Additional comments

Offering a broad range of training courses across various business domains it is our pleasure to welcome you soon at our Bosch Building Technologies Academy.

As stated in the beginning, you can register to attending online, virtual or class room trainings as part of Professional, Expert or Master levels at the following link:

<https://academy.globalteach.com/ST/Login.aspx>

This document is valid for 2020 trainings and information provided are subject to changes without further notice.

Please note that trainings may be cancelled in case there are not enough participants. For further details please refer to the terms & conditions at our Bosch Building Technologies Academy, see link above.

Prices for class room trainings are prices before VAT; online training courses are free of charge and students can attend those courses at the time and speed they prefer.

In case of further questions, please contact us at:

training.emea@bosch.com
