## Access Management System

Access control is an essential component of building security. You need a truly reliable software to manage the access profiles of different users of your facility. We introduce to you our Access Management System (AMS), the versatile solution for your access control projects.

**Unmatched  
security**

**Cost-effective  
solution**

**User-friendly  
experience**

**Open for  
integration**

# Access Management System (AMS)

## Unmatched security

- **Proactive data & cybersecurity:** Benefit from continuous software updates that keep your system fortified against emerging threats.
- **Robust Ecosystem:** Enjoy peace of mind with a unified hardware & software that eliminates vulnerabilities between different suppliers.

## Cost-effective solution

- **Versatile features:** We deliver exceptional value with a wide range of included features and add-ons. AMS offers an all-in-one solution that simplifies access management and enhances security.
- **Flexible scalability:** Easily replicate configurations for satellite locations, ensuring consistent security across all sites.

## User-friendly experience

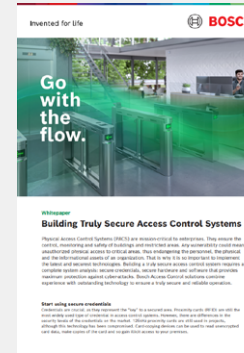

- **Intuitive tools:** Our user-friendly interface simplifies configuration, enabling operators to respond swiftly and efficiently.
- **Comprehensive support:** Get started with high-quality training, how-to-videos, and dedicated support to ensure a smooth operation.

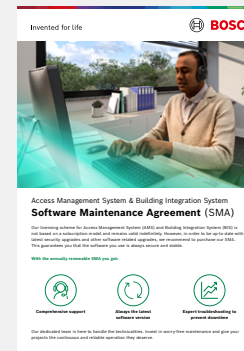

## Open for integration

- **Customizable solution:** Our Access Control API enables effortless integration with your existing security and safety solutions and value adding services.
- **Expanding partnerships:** We collaborate with numerous industry leaders, and we continuously add new partnerships.

In the onboarding view, receptionists can create, change, and add visitor data and assign pre-defined sets of authorizations such as regular visitor or VIP.

Map view of the building with real floor maps imported into the system. Drag and drop functionality for icons that represent controllers, doors and building objects.

# Why choose our Access Management System?

- 1. Unrivaled reliability:** Experience the best-in-class access control solution designed for maximum dependability and performance.
- 2. Future-proof investment:** Make a smart investment that adapts to evolving security needs, ensuring long-term value.
- 3. Cutting-edge development:** Benefit from a powerful combination of hardware and software, meticulously developed in Europe for superior quality.
- 4. Top-tier security:** Rest easy knowing our system is built on the latest encryption standards, safeguarding your data and access points.
- 5. Expert support:** Gain access to application advice and technical support from a global network of experts, ensuring you have the guidance you need.

**Choose AMS for a secure, reliable, and future-ready access management solution that empowers your organization's security.**

# Credential tools
