

Visitor management

Integrated solution for visitor management with VisitForm

VisitForm is a visitor management system that integrates with Bosch Access Management System (AMS) to manage access control for resident, visitors and vendors in a gated community. This solution empowers community and property managers by offering a centralized, streamlined process for effective community management and access control.

Functioning as a Software-as-a-Service (SaaS) application, VisitForm provides gatehouse staff with an intuitive interface, ensuring a user-friendly experience that enhances both security measures and workflow efficiency. The integration with AMS enables VisitForm to manage access control via cards, allowing easy assignment to residents, visitors, or vendors, thereby optimizing the overall security infrastructure. An integral component of the VisitForm system, is the Residents Portal App, allowing residents to effortlessly manage their expected visitors and vendors directly through the app. This resident-centric functionality enhances convenience and autonomy for the resident but also lightens the workload for gatehouse and community staff, promoting a smoother operational experience.

- Scan visitor QR codes for streamlined access
- Manage properties and residents
- View logs of visitors and vendors
- Manage incoming mail and parcels

The VisitForm Residents Portal App, VisitForm Access and VisitForm Edge Server are connected to the VisitForm Cloud Servers. AMS is installed on-premise to provide access control. VisitForm Edge Server is the on-premise software that intermediates between AMS and the cloud-based VisitForm software.

Compatibility

| VisitForm Techonology AB | Bosch Security and Safety Systems |
|-----------------------------|--|
| VisitForm Edge | Access Management System 5.0 and higher |

Key features

- AMS enables easy access control assignment for residents, visitors and vendors
- AMS and AMC provide robust hardware and software solution for gatehouse entry points
- AMS server sends and receives access control data to and from VisitForm software
