BOSCH

Video management

Integrated security solution using ISS SecurOS® video management

ISS offers a comprehensive suite of video intelligence solutions, called SecurOS® Video Intelligence Platform. The video management software integrates numerous analytic modules to deliver customized solutions to organizations, amongst which with Bosch access control. The integration between SecurOS® Integration Point and Bosch Access Management System (AMS) seamlessly transfers access control data to the ISS ACS interface, enabling a smooth and powerful security solution.

The integration of the two systems streamlines operations. AMS provides the access device configuration and definitions of access profiles. With the console application developed by ISS, access control data can be integrated with the SecurOS® for full situational

awareness and control in the ACS GUI. This allows SecurOS® operators to view and handle live access control events and device states. For example, the operator can open and close doors and view door events like 'Held open door' or 'Unauthorized opening'.
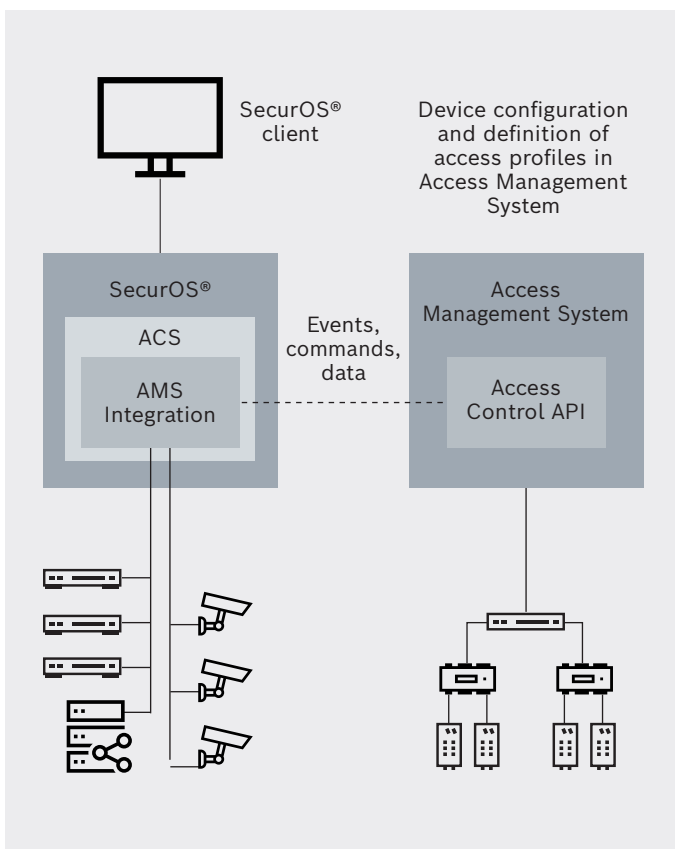

- Link and control access control devices from SecurOS® Map (traditional and GIS)
- Swipe ticker viewable in SecurOS® monitoring window
- Configure alarms and operator response based on access events and state changes

Compatibility

| ISS	Bosch Security and Safety Systems
SecurOS® V11.7 R1 AMSSetupProject V2.3	AMS V5.2 and higher

Key features

- Access Management System coordinates the activities of all access control hardware and software
- Secure, encrypted Access Management Database stores all access control master data
- Access Management Dialog Manager for configuring and enrolling new cardholders
- Access Control API provides REST API for master data and gRPC API for live events
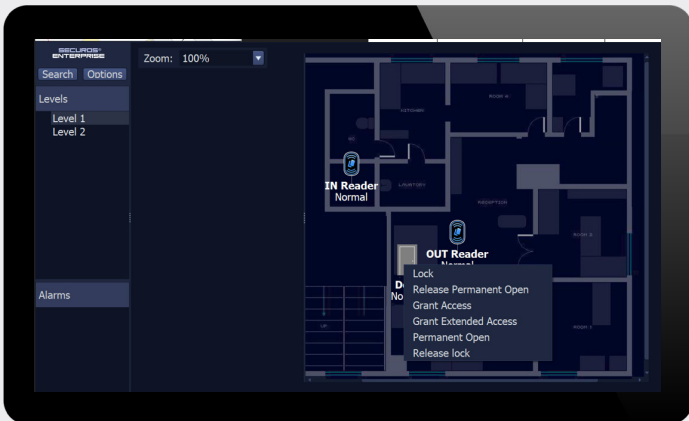

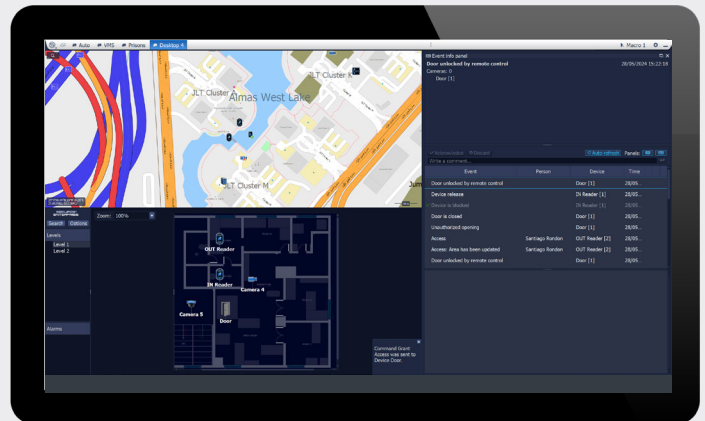

'Held open door' event shown inSecurOS® Map and ACS GUI

'Access granted' event in ACS GUI

Door commands sent to access control objects in traditional Map

GIS and traditional Map with ACS GUI

Bosch Security and Safety Systems is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world.
