DICENTIS Software licensing:
Overview software feature packages

The fully IP-based DICENTIS Conference System is designed for optimal meeting efficiency. Our new software licensing offers cost-effective feature packages for any conference needs.

The DICENTIS system already includes a comprehensive feature set that is available immediately upon registration. To optimize workflows and meeting progress, the system can be extended with the optional premium or ultimate feature packs.

Discover how our feature packages operate and what's included.

Invented for life

BOSCH

Simplify the decision-making: Premium and Ultimate feature packages

Premium Feature Pack - Includes standard features for participant registration, voting, and language selection.
Ultimate Feature Pack - Provides extended voting and interpretation capabilities.

The required licenses correspond to the number of meeting participants. The available features in the different feature packs are as well available for third-party interfacing through API and Conference protocol.
