# Midsized Shop

A shopping experience should always be rewarding, comfortable and fun

Whether it is an afternoon of casual browsing or looking for a specific item, the shopping experience should be rewarding, comfortable and fun. Attracting customers into a shop and keeping them there both rely on providing a sense of welcome and well-being. That's where a high-quality music and voice announcement system really helps, both in setting the mood for shopping and for keeping shoppers informed. Busy retail stores with multiple sections and floors can often find this challenging, but not any longer. The PLENA matrix Digital Sound System, combined with the LB20 premium commercial loudspeakers, delivers beautiful audio for

music and messaging. This stylish system hits exactly the right note for the perfect shopping experience.

- ▶ Shop area: approx. 500 - 800 m<sup>2</sup> (1640 - 2624 ft<sup>2</sup>)
- ▶ Up to 8 independent zones
- ▶ Room acoustics and loudspeaker equalizing adjustments possible
- ▶ 4 microphone/line, 3 music source, call station and emergency input
- ▶ Flexible control via wall panel, PC or mobile device

The layouts are for general and visual purposes only and should not be directly applied to any installation.
