New Features:

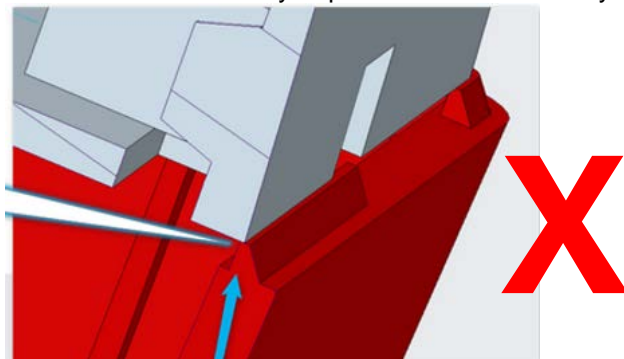

Please be careful when conducting the following step from the installation manual:

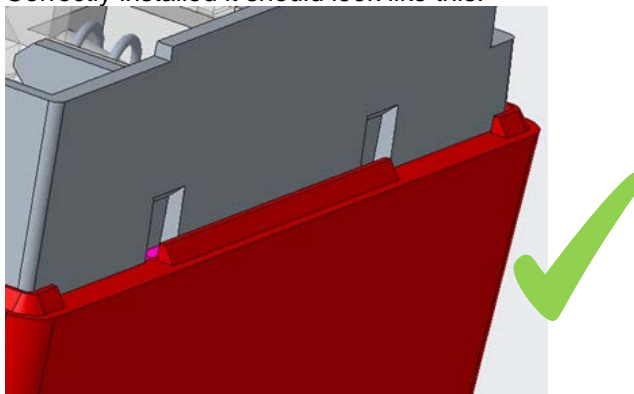

It is possible that the manual call point housing does not fit easily between the positioning ribs (Rib A and Rib B).

Please make sure that you place the MCP correctly between these ribs. Do not accept overlap like this:

Correctly installed it should look like this:

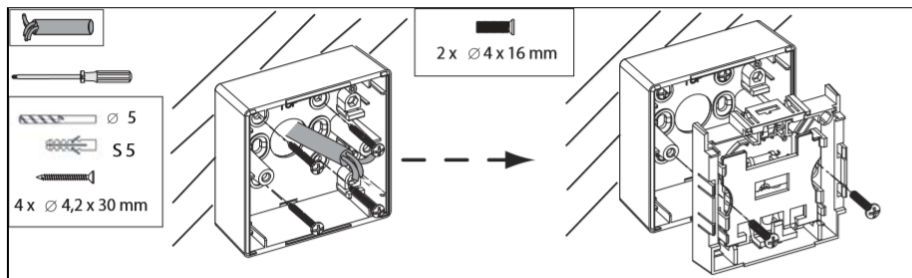

Installation Note for all manual call points (RW) indoor types:

Herewith we point out that a wrong installation of manual call points FMC 300RW and FMC 420RW indoor series could affect the IP class. To ensure that IP class is not affected due to wrong installation please be aware that the backside and the front side of manual call point housing fits perfectly together. Therefore it is recommended to check also the field during next periodical inspections.

1. How it shall look like:**2. How it don't shall look like:**

In case of wrong installation a cleft is visible as shown in the pictures above.

3. At which installation step you should take care:

2

In the installation guide of the manual call points RW types you can find step 2 assembling, as shown above in that screenshot.
