

**BOSCH**

Invented for life

## Intrusion Alarm Systems **Panic Button**

The panic button is designed to manually and unobtrusively trigger an alarm in the event of an emergency, at workplaces such as banks, jewelry stores or petrol stations.

- ▶ **To connect to an intrusion panel**
- ▶ **Tamper contact**
- ▶ **Surface- or flush-mounting of the cable**
- ▶ **Compatible with optional cap with cover**

The mechanical design of this product is outstanding due to **intelligent design features**.

**Screwless enclosure** for very quick and easy installation the enclosure can be opened and closed without any tools.

**Flat and round design for more comfort.**

Panic buttons are typically installed under a table. The round design prevents people to hurt their knees.

The panic button can be used in:

### **ND 100 GLT Panic Button**

Panic button in DC circuit technology (GLT)

### **ND 200 LSN Panic Button**

Panic button in LSN technology
