

# Bosch Forensic Search Plug-in

AI-powered plug-in for advanced incident investigation

In partnership with:

For swift and precise incident retrieval, the Forensic Search Plug-in seamlessly integrates with Genetec Security Center. It uses Bosch IVA Pro metadata which is already present on all cameras by default. There is no need for additional hardware and it is fully compatible with all Bosch cameras.

## Accelerated incident retrieval

- Pinpoint specific incidents within vast video data
- Eliminate time-consuming manual searches

## Industry-tailored solutions

- Features for transportation, cities, and critical industry sectors
- Address unique security challenges

## Unparalleled convenience

- Seamless integration based on Genetec storage solution
- User-friendly interface with intuitive controls

## Enhanced investigative capabilities

- Advanced search filters, object classifications, tracking
- Uncover evidence and patterns with precision

## AI-Powered precision

- Cutting-edge algorithms for automatic event identification
- Rapid extraction of required information
