

Integrated features with Genetec Security Center

Video Systems

Video Analytics events and overlays

Alarm triggering and automatic alarm follow up

Visualization of object shapes and trajectories

End-to-end data security solution

Fire Alarm Systems

Video based fire detection (AVIOTEC)

Detect fire or smoke with Intelligent Video Analytics

Modular fire panel: FPA-5000

Integration based on OPC protocol

Intrusion Alarm Systems

B and G series & MAP 5000 control panels

Auto discovery of intrusion system entities

Federated video of intrusion panels

Real-time status monitoring of devices

Manual or automatic control

Event monitoring with video verification

Public Address

Public Address (PAVIRO)

Send messages or announcements to different zones

Program different zones as extensions

Number to reach the desired zone is indicated

Public Address and Voice Alarm System (PRAESENSA)

Support zone or group calls

Text to speech

Message activation

Critical Communications

TELEX Radio Dispatch

Send messages or announcements to mobile radios

Have two-way communication with mobile radios

Genetec solutions with Bosch cameras

Restricted Security Area (RSA) surveillance

Perimeter security with target tracking on a map and automated camera handover

Occupancy Management Package

Use Bosch cameras with Video Analytics as a sensor to build your customized occupancy package

Stratocast (Cloud-based video monitoring)

Support for Bosch cameras and Video Analytics

Transportation Sensor Suite (TSS)

Bosch cameras with Video Analytics at the edge can be used as intelligent sensors for ITS applications and Dashboards

BOSCH
Invented for life
