Invented for life

Integrated Security, Safety and Access Control Solution

Visitor Management

Bosch Security and Safety Systems and HID Global

- ▶ Bosch BIS meets HID Global's EasyLobby SVM – A powerful solution for visitor management
- ▶ Visitor check-in in 20 seconds or less
- ▶ Can be set up as a kiosk to allow self check-in
- ▶ Capture of accurate, detailed visitor information by scanning licences
- ▶ Tighter security due to visitor verification and screening
- ▶ High quality, legible badges project professional images
- ▶ Automation of the pre-registration and approval process through the use of the eAdvance module

EasyLobby Secure Visitor Management (EasyLobby SVM) is the main application for processing visitors by providing the customer all needed features:

- ▶ ID scanning
- ▶ Record creation
- ▶ Badge printing
- ▶ Watch List screening
- ▶ Check-in and Check-out
- ▶ Email notification
- ▶ etc.

EasyLobby SVM gets installed on each Windows workstation where visitors will be processed. Any number of EasyLobby SVM workstations can share a central database (SQL server or Oracle). Now, EasyLobby SVM provides integration with the Bosch Building Integration System (Bosch BIS).

The solution allows its customers to assign an unused access card to their visitors and, upon check-in, to have the visitor automatically entered into the access control system and their card gets activated. When the visitor is checked-out the card is deactivated. The EasyLobby customer may also use the barcoded visitor badge to grant the visitor access via barcode readers attached to the access system.

Compatibility

HID	Bosch Security Systems
<ul style="list-style-type: none"> • EasyLobby SVM 10.4 • All FARGO card printers • HID Prox • iClass cards • iClass SE cards 	Bosch Building Integration System version 4.5 and newer

Applications / Vertical Markets

Small-medium and enterprise business

Healthcare

Key features covered in the integrated solution

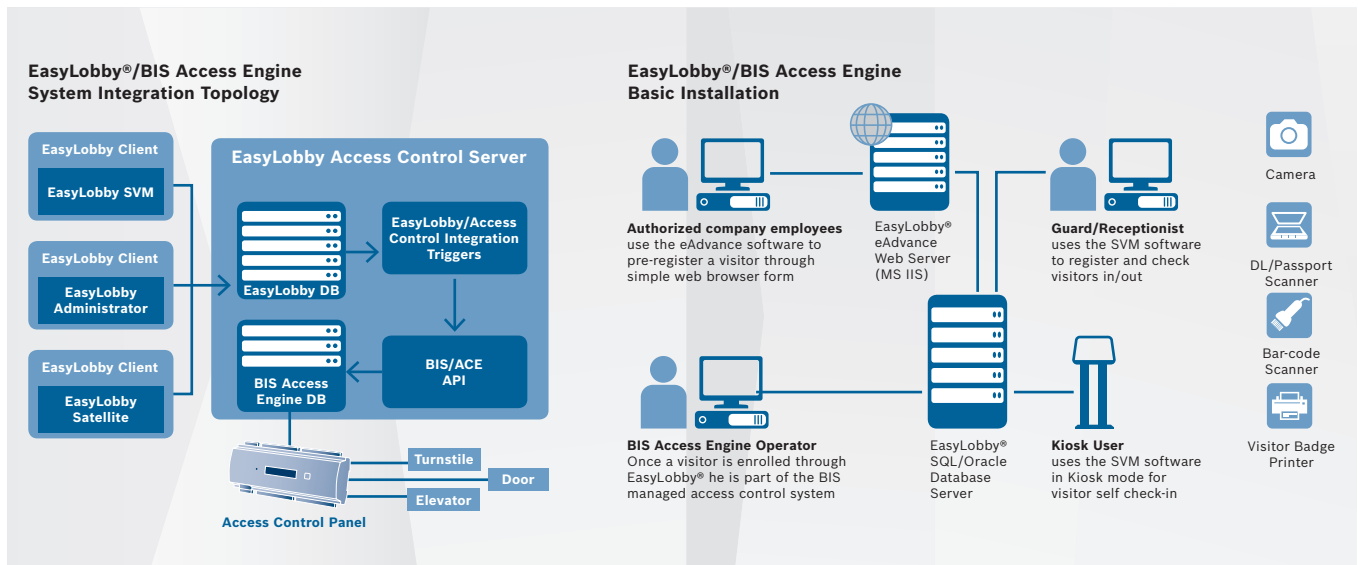

Enhanced building security with EasyLobby

- Permissions can deny access to secure areas.
- Access card can be activated only upon visitor check-in.
- Receptionist needs to manage only a single application for visitor access.
- Access cards can be automatically deactivated upon check-out or eliminate unauthorized use after a set time.

Improved visitor experience for regular guests

- Quick and easy access to turnstiles, elevators or doors within a building.
- Eliminates the need of escorting known visitors through the building.

EasyLobby®/BIS Access Engine System Integration Topology and Basic Installation

The Bosch division Security and Safety Systems is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world. Additional information can be accessed at www.boschsecurity.com
