

Video management

Integrated security solution with Dahua DSS video management

Dahua DSS Bridge enables Dahua DSS Pro video management solution to receive events and alarms from Bosch Building Integration System (BIS). Dahua DSS Professional is a centralized management system designed for large-scale and industrial applications. It provides centralized video monitoring and works seamlessly together with connected Bosch hardware. The alarm notifications of BIS can be verified by video streams from Dahua DSS connected cameras in a unified platform. Thanks to the established connection between DSS Professional and BIS server, functions such as receiving, recording or searching events from the Bosch connected security and safety subsystems are supported. Dahua DSS Bridge is installed on the Dahua DSS server and enables the communication between Dahua DSS Pro and BIS.

- Only one front-end system for Dahua video and Bosch access control, intrusion and fire events
- Visually verify & handle alarms with just a few clicks in DSS
- Fast configuration and secure communication for both systems

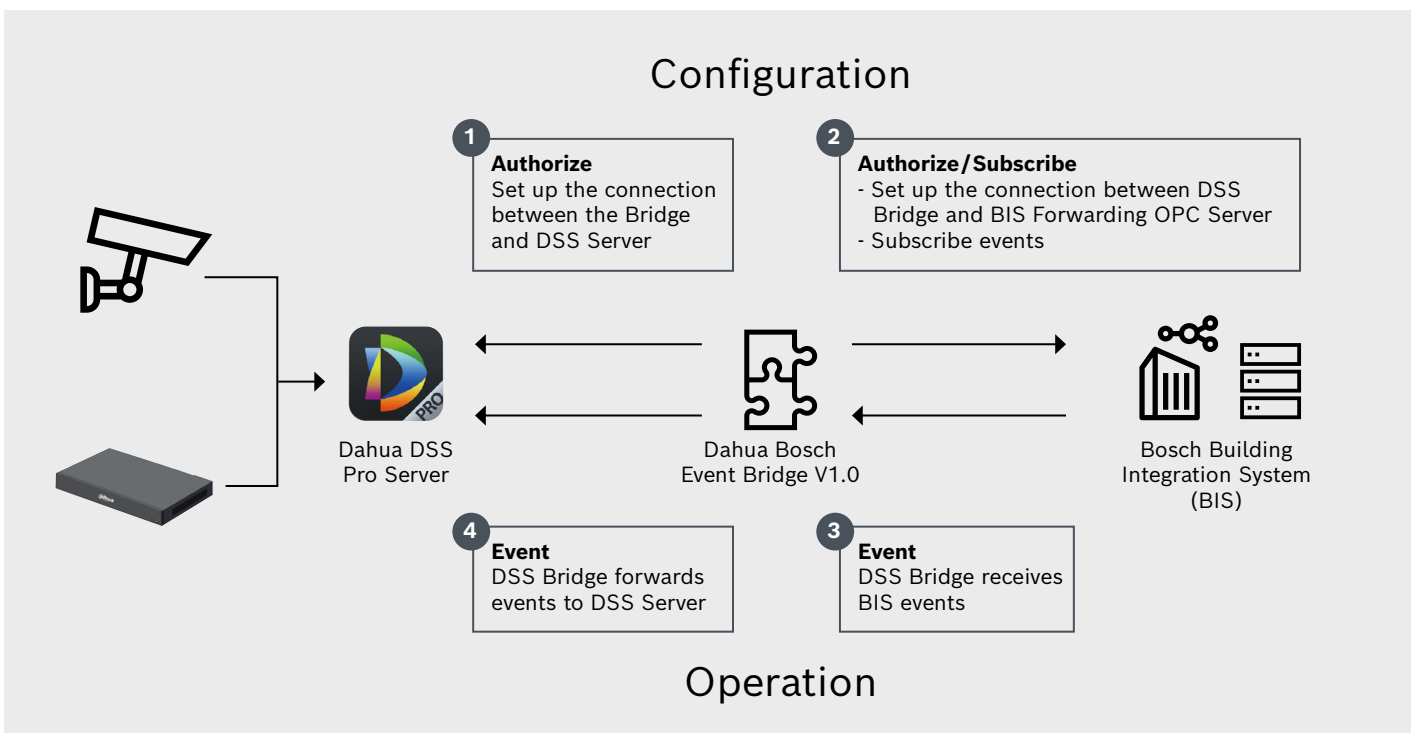

Compatibility

Dahua

Bosch Security and Safety Systems

DSS Professional V8.0.4 and later versions with Dahua Bosch_Event_Bridge_V1.0

Building Integration System 4.8 and higher

Commercial buildings

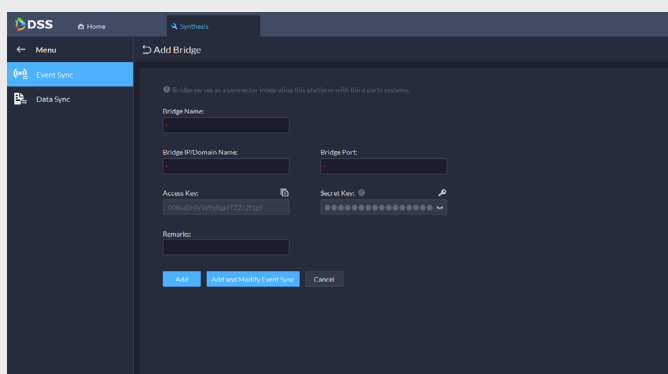

Banking

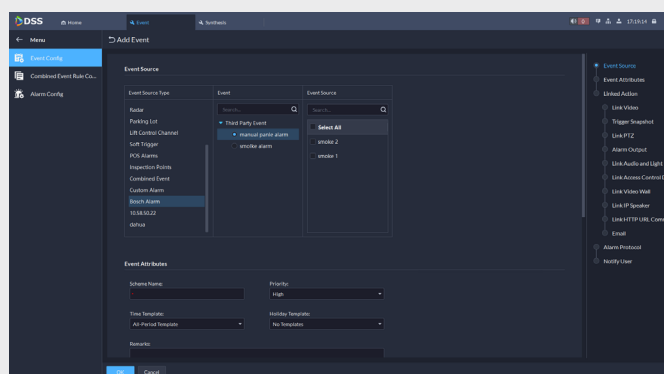

Critical infrastructure

Key features

- Real-time events from BIS (access control, intrusion, fire, etc.)
- BIS event history searchable in DSS
- Secure communication and authentication between DSS and BIS
- Fast configuration of BIS events and linked actions in DSS

Configuration of DSS Bridge and BIS events in DSS settings

Configuration of BIS alarms and actions in DSS

Bosch Security and Safety Systems is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world.
