

Signature scanner

Integrated solution for smooth signature scanning

To facilitate capture of employee or visitor signatures the signature pads from signotec are integrated with the Access Management System (AMS) and Building Integration System (BIS). Simply connect one of the supported signotec pads via USB to the BIS / AMS workstation, wait until installation is finished and start working.

For any new employee the signature can be captured and stored on the server. From there they can be printed on the ID card.

For visitors the captured signature can be stored in the system for verification with any following visit. With its 155 x 120 x 10 mm, the SIGMA pad is extremely compact, tough and thereby perfect for any use. When used stationary, the SIGMA stays in its comfort zone and adapts itself to your personal needs, due to the flat construction and the optional vertical penholder.

- Affordable LCD signature tablet fully integrated with Bosch Building Integration System (BIS) and Access Management System (AMS)
- Captures signatures directly from the BIS /AMS cardholder or visitor registration dialog
- Ultra-slim design – only 1 cm thick to fit on most reception desks
- High-resolution display for luminous text and graphics giving the best edge impression of BIS / AMS
- No special pen or batteries required for convenient use
- USB cable is firmly linked with the pad (Anti-theft protection)

Compatibility

signotec	Bosch Security and Safety Systems
Systems signotec pads SIGMA, OMEGA and GAMMA	GAMMA Bosch Building Integration System (BIS) v4.1 and higher
	Access Management System 3.0 and higher

Verticals with high frequency of visitors: office buildings, industrial sites, hospitals, prisons, governmental buildings, etc.

Verticals with tough requirements to compliance/regulations: transport, energy, critical infrastructure, etc.

Key features

Cardholder Registration of Visitors and Employees

- Capture and securely save the signature of a visitor or employee during registration.
- Compare the stored e-signature with an ID document shown in any upcoming visits.
- Delete the e-signature when data privacy laws require.
- Often required for compliance reasons.

Quick installation and intuitive use of signotec pads

SIGMA

OMEGA

GAMMA

A signature is registered in only 2 steps:

1. During registration process in BIS Access Engine / AMS click the button "Record signature" below tab "signature".
Effect: The signotec pad switches to input mode.
2. Sign your name on the signotec pad and click ☒ when you are finished.
Effect: The signature is now saved in BIS Access Engine.

The Bosch division Security and Safety Systems

is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world.
