

BOSCH

Invented for life

Integrated Security, Safety and Video Management Solution

Storage Solution

Bosch Security and Safety Systems and EMC

- ▶ Full functionalities of Bosch Video Recording Manager on EMC VNX & VNXe
- ▶ Possible to use almost all storage interfaces (iSCSI, FC, FCoE etc.)
- ▶ Option for no single point of failure for iSCSI Gateways
- ▶ Reuse existing EMC storage infrastructure to lower maintenance costs
- ▶ EMC storage integration allows for maximum resilience

EMC²

Bosch Video Management System (BVMS) is now capable of recording video on EMC's VNX and VNXe storage arrays. This solution uses iSCSI Gateways, which allows customers the flexibility to integrate BVMS with EMC Block Storage Platforms like VNX, VNXe and VNX VSS. iSCSI gateways can be virtualized on a High Availability Failover Cluster using Microsoft Hyper-V or vmWare ESX(i) to ensure no single point of failure.

Its decentralized architecture makes BVMS highly resilient towards components failure. This availability also applies when using an EMC storage solution.

Compatibility

EMC	Bosch products
EMC VNX, VNXe, VNX VSS - Microsoft (iSCSI Gateways) Windows Server 2012 R2	BVMS 6.0 or newer

Applications / Vertical Markets

All Enterprise customers having an existing EMC Storage System

▶ **Critical Infrastructure**
(airports, metro systems)

▶ **Defense**

▶ **Prisons**

▶ **Industrial**
▶ **Energy**

▶ **City Surveillance**

▶ **Health Care**

Key features

Simplifies maintenance

by using a single storage system for CCTV and other tasks.

Highly resilient

with no single point of failure.

Multi protocols

as it allows to use Fiber Channel, iSCSI or FCoE storage.

Storage centric video systems

as this integration enables System Integrators to provide a Bosch solution when an EMC storage has been selected.

EMC storage hardware

EMC VNXe series

EMC VNX series

EMC VNX-VSS series

The Bosch division Security and Safety Systems is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world. Additional information can be accessed at www.boschsecurity.com

EMC is a global leader in enabling businesses and service providers to transform their operations and deliver information technology as a service (ITaaS). Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments to store, manage, protect and analyze their most valuable asset – information – in a more agile, trusted and cost-efficient way.
