

BOSCH

Invented for life

Integrated Security, Safety and Video Management Solution

Storage solution

Bosch Security and Safety Systems and Hewlett Packard Enterprise

- ▶ Do more for less: BVMS running on a single, all-in-one, HPE storage device
- ▶ Fully optimized to benefit from built-in BVMS resilience
- ▶ The HPE ProLiant DL380 Gen 10 Server is securely designed to reduce costs and complexity
- ▶ Security through firmware and optional chassis intrusion options

Hewlett Packard Enterprise

Combining the BVMS and Bosch Video Recording Manager with the HPE ProLiant DL380 Gen 10 enables customers to deploy a high-performant, flexible and cost-effective video surveillance system.

The HPE ProLiant DL380 Gen 10 Server delivers the latest in security, performance and expandability and – together with BVMS – builds a robust, performant and cost effective integrated solution.

The combination of HPE storage devices and Bosch video surveillance components has been extensively tested. Not only the performance of the solution has been considered: several failure scenarios are considered to ensure the system continues to operate as expected.

The tested HPE devices and scalability of the BVMS (from Viewer to Enterprise) makes the combined solution suitable for multiple video surveillance applications such as healthcare, transportation, commercial buildings or education.

Compatibility

Hewlett Packard Enterprise	Bosch devices
HPE ProLiant DL380 Gen 10	BVMS 8.0 or newer

Applications / Vertical Markets

Healthcare

Transportation

Commercial buildings

Education

Key features

Leverage Bosch Video Recording Manager

Using the Bosch Video Recording Manager and edge-recording frame loss will be a thing of the past. Additionally, edge-recording removes the need for an NVR and therefore reduces a single point of failure in the system.

Verified performance

An extensive performance test was done to ensure customers can utilize the performance offered by the hardware platform as well as rely on continuous operations.

Cost-effective

Integrated server-storage appliance: combining the video management system and video surveillance storage on a single device reduces deployment and management costs.

Future-proof

The system grows with your needs: from BVMS Viewer to BVMS Enterprise.

HPE ProLiant DL380 Gen 10

The Bosch division Security and Safety Systems is a leading global supplier of security, safety, and communications products, solutions and services. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security and Safety Systems develops and manufactures in its own plants across the world. Additional information can be accessed at www.boschsecurity.com

Visit www.ipp.boschsecurity.com for details on the Bosch Integration Partner Program

Hewlett Packard Enterprise Company (commonly referred to as HPE) is an American multinational enterprise information technology company based in Palo Alto, California, founded on 1 November 2015 as part of splitting of the Hewlett-Packard company. HPE is a business-focused organization with two divisions: Enterprise Group, which works in servers, storage, networking, consulting and support, and Financial Services. HPE delivers high-quality, high-value products, consulting, and support services in a single package. HPE has industry-leading positions in servers, storage, wired and wireless networking, converged systems, software, services and cloud.
