

Security Information

Apache Log4j Vulnerability (CVE-2021-44228) “Log4Shell”
<https://nvd.nist.gov/vuln/detail/CVE-2021-44228>

We are aware of the Apache Log4j Vulnerability (CVE-2021-44228) “Log4Shell”.

We are currently analyzing if any of our products are affected. In case any of our products are affected, we will publish respective Security Advisories on this web site:
<https://www.boschsecurity.com/xc/en/support/product-security/security-advisories.html>.

Remote Portal and Cloud Analytics Services are all patched to a non-vulnerable version of Log4j and were not impacted.

Our analysis so far (see timestamp at end of this document) showed the following products **ARE NOT AFFECTED:** (the following list will be updated as new information is available)

BT-VS

- IP Cameras (all families CPP4-14)
- VIDEOJET decoder (VJD-7513, VJD-8000)
- Video Recording Manager (VRM)
- Configuration Manager
- Monitor Wall
- Project Assistant
- Video Security App (Android & iOS)
- Video Security Client
- Tracking & Recognition Service (TRS)
- VideoSDK
- BVMS
- Intelligent Insights
- DIVAR hybrid/network
- DL 380 Servers
- E2800 Storage Arrays

BT-CO

- Intercom products

BT-AI/PAA

- AEC – Access Easy Controller
 - AEMC
 - AMS – Access Management System
 - AMC2 – Access Modular Controller
 - APE – Access Professional Edition
 - BIS ACE – Building Integration System, Access Control Engine
 - SE – Security Escort
-

BT-AI/PAI

- Sensors
- Nothing on panel/system side is Java based
- B Series and G Series systems products, including the G450
- Installer Service Portal patched to a non-vulnerable version of Log4j and was not impacted.

BT-FIR

- Panels:
 - FPA-1200/5000 controller
 - AVENAR controller
 - FPC-500 controller
- Applications:
 - FPA-5000 OPC Server
- Remote Services:
 - Secure Network Gateway
 - Remote Connect (patched; see Remote Portal)
 - Remote Maintenance (patched; see Remote Portal)
 - Remote Alert (patched; see Remote Portal)

BT-IE

- UGM2040
 - FASOS
 - Energy Platform
-
